Built for Your Hands Designed for Your Life

2024

The basis of Chinese calligraphy and Chinese writing is logogram/pictograms or graphic representations which evolves over time to form the current system.

Designed always with an eye towards the ergonomics of the end user, Artisan's logo reflects this strive for ease in use and its heritage in the calligraphy of the

East. Its evolution is shown in the graph below.

The basis of the Artisan logo is the character for "human", shown on the left. This is the modern version, which changed through the many centuries and many

forms shown in the progression to the right. The basis of the Artisan logo comes from the style of writing originating in the time of the Qin dynasty. The final

rendition of the logo is a geometric mirror image of the character that relays the "human-centric" design philosophy behind the Artisan brand.
