

HEWN

THE BETTER WAY
TO FLOOR

ABOUT US

WE'RE HEWN

We began as a team of design crusaders who spent decades creating customer living spaces for design-obsessed clients. Over the years, we've watched trends come and go, and flooring choices succeed and fail. We've vetted countless materials and helped endless clients navigate the challenging process of selecting and designing floors. Along the way, we've learned a thing or two about what works and what doesn't—and we understand that traditional floors, like wood and tile, are difficult to install, manage and maintain. That's why we made it our mission to reimagine how floors are built, bought and sold by creating Hewn, a flooring innovation company, and the better way to floor.

Built for real life, and by design, Hewn is the better way to floor for those who care as much about form as they do about function.

OUR MISSION

Make breathtaking and resilient flooring available to all through an unwavering commitment to better. Better design, better experience, better results, better performance, and better than traditional flooring for an effortless, enduring, and artisanal look you'll love—and the better way to floor.

HEWN STONEFORM® FLOORING

We deliver better flooring that's uncomplicated, resilient, and affordable. Easy to select, buy, install, and maintain—our position-and-lock Stoneform planks look just like traditional floors—but outlast and outperform them.

Hewn's revolutionary Stoneform® floors are crafted largely from stone and built to capture the dimension, texture, and feel of traditional flooring—without the upkeep, risk, or cost. Nearly indistinguishable from hardwood and tile, Stoneform® is as elegant and breathtaking as it is resilient, waterproof, and eco-friendly.

Our direct-to-your-doorstep model is guided by a curated shopping experience and powered by digital design tools, in-home trials, and uncomplicated tutorials. We've also made installation more effortless than ever with a patented, Position-and-Lock system that's perfect for every project—be it do-it-yourself or do-it-for-me.
