

Attach Heat Lamp to Classic Value Rod

Sizes 3838 and 4848 Only

Check parts as shown below.

Using the carabiner, hang the lamp on the rod as shown.

Attach the white plastic clip for safety. Make sure it does not pull the cord.

Be sure the lamp is **NOT** hanging by its cord. If there is any pull on the cord, the lamp will be damaged and its safety compromised.

If desired, you can raise the lamp a couple inches by omitting the carabiner as shown (feed the rod through the lamp before inserting the rod into the whelping box).
