

# Mobilising your IT with the MPS2000

Falcona's range of mobile workstations enable the receiving, inspecting, recording, labelling and re-routing of products in and out of goods receiving, all at the point of activity. Tasks such as inventory checks, quality control monitoring, product labelling and packaging can be handled using the same mobile workstation, removing the need to walk to fixed locations.

The MPS (Mobile Picking Station) is designed with ultimate flexibility in mind. This tough, warehouse ready workstation provides independent power for your IT equipment, easily supporting a host of applications. You can enhance many of your traditionally "fixed position" activities and processes and hand your employees the power to increase efficiency and reduce errors.

**Simple to install and use**

The MPS 2000 allows you to take IT equipment around the warehouse effortlessly.

Logistics, manufacturing and warehouse environment's demand a level of detail that can often be a challenge when faced with these fast moving working environment. Falcona produce a range of powered work stations that bring a new opportunity to increase productivity and help reduce mistakes through mislabeling or data entry errors

Fixed workstations limit workers' freedom and efficiency. Having to rush back and forth from one point to check information can be a huge inconvenience, sapping precious time and energy.

With Falcona Solutions' mobile workstations, staff productivity is increased, as they can take their terminals with them, performing the work they need to at any location. Consequently, any computer-based training can be performed away from the manufacturing floor, to avoid interfering with busy teams.

Workers can use a full-screen computer or touchscreen for up to eight to ten hours, depending on the amount of scanning and printing performed.

## Testimonial

*"Bottom line - these carts do exactly what they say they'll do. We were up and running almost immediately and realised the ROI within six months."*

## Mobilising your IT

59 – 60 Station Road, Windsor, SL48TX

## Features

- On-board 240V power
- Display mount with and twin-screening options
- PC or laptop draw with locking options
- Slide out label printer draw with media storage
- A range of bar code scanner or PDA mounts

## Benefits

- Reduced footsteps and reduced "wait" time makes a big difference to working efficiency
- Staff have full screen access to company solutions – where they need it
- A very cost-effective alternative to fixed workstations, freeing staff from static terminals
- Adds a new dimension to any warehouse where the MPS is used as a management tool or all-in-one pick and pack solution!

## Uses

- Print barcode labels where and when needed, while performing other tasks
- Run a full-screen or touch computer for as many as eight to ten hours (depending on the usage of printing and scanning facilities)
- Conduct stock takes with the option to adjust stock live on your own system
- Goods in and dispatch management with improved freedom and staff-accessibility
- Bring your IT to the location you need it without the cost of new IT infrastructure
