- POP10CI USB-C

Key applications

- ✦ Tablet POS
- ✦ Retail
- ✦ Hospitality
- ✦ Salon

Made for
 iPhone | iPad | iPod

For POS at its most elegant, Star's mPOP meets your business needs.

Outstanding connectivity and design, plus intuitive functionality and simple integration are delivered ready to work with your chosen mobile software and card payment system...welcome to a new era for Tablet POS.

Advanced mobile devices and app software have opened up new avenues for retailers. At Star Micronics we've developed the world's first conceptually driven, combined point of purchase cash drawer and printer in response to the need for an easily integrated mobile POS system.

mPOP works with supported Apple iOS, Android and Windows tablets, giving retailers the freedom to use the platform that works for them.

▶ SIMPLE & Easy-to-use

Just one power cable is needed to operate the printer and cash drawer as well as connected peripherals. The clear mPOP LCDs will let you know any printing issues such as paper empty.

▶ Secure

The mPOP can be attached to a counter using the desk clip provided or with a 3rd party Kensington lock cable system. Any tablet stand can be used with the mPOP. However, the tablet stand provided with Star's POPPack option is attached to a heavy, metal plate and provides peace of mind whilst retaining the ability to separate stand and mPOP for transport

at end of day, if required. There is also a more secure under counter mounting option if required.

▶ Reliable 100mm/second printer

With intuitive top loading & easy front feed, the printer features an anti-curl mechanism for printing on thermal receipt paper which does not need ribbons or toner and is readily available. The partial cut guillotine automatically cuts the 58mm wide receipt so it won't drop on the floor. Simple paper loading – just push the front printer panel and press the easy release lever to drop in the paper roll and then print.

▶ Compact cash drawer

A clean, fast drawer release reveals 6 coin holders capable of taking full bank bags of coins and 4 upright note dividers. There is a low cost 8 coin option if required. Higher value notes can be stored securely under the coin inserts and a software lock provides extra security.

▶ Software and Connectivity

See www.mPOP.com for more information about mPOP printer and cash drawer connectivity as well as the latest compatible Mobile POS, Retail and Hospitality software.

Tablet Stand & mPOP Plate

Star 1D Scanner

SCD222 Customer Display
