Subject: GFO "The Green Oil Additive"

Dear Will,

On behalf of the Mapleton Public Schools transportation department I would like to thank you for your help in getting the 1992 Isuzu delivery truck to pass the emissions test. The sample quart of Green Oil Additive you provided was used in this vehicle and as a result the vehicle passed the emission test after two previous fails. The school district was forced to purchase a new delivery truck due to the Isuzu not passing, however, we were able to get \$1000 more for the vehicle when sold.

Due to the short time we had the Isuzu after using the Green Oil Additive, we did not have the ability to properly calculate other cost savings that may have occurred. Thanks for the opportunity to pilot and track a few of our school buses so that we can consider the benefit this product can provide above what we have already witnessed.

It has been a pleasure working with you and I look forward to seeing the outcome of our next trail.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ronna Gerst', with a long, sweeping horizontal line extending to the right.

Ronna Gerst
