

How to Install

REGULAR WALL DECAL APPLICATION GUIDE

Wait! Before you begin...

Remember that our decals work best with matte, eggshell, satin or semi-gloss paint finish and are not recommended on highly textured concrete, highly textured wallpaper, stucco, or primer finishes. Now, let's get started shall we?

STEP 1

Pre-clean your surface with a damp cloth and ensure the surface is dry before proceeding. Note: Allow 2 weeks for paint to cure before applying your Decal.

STEP 2

Decals are for one-time use, so take your time to choose the perfect spot. Tape the design to the surface with masking tape to make sure it's exactly where you want it. Use a level if necessary.

STEP 3

Fold back the top of the design, begin peeling the white backing paper from the graphic and transfer tape at a 45° angle. If some of the decal doesn't come free, press it down again, and give it a quick scratch on the transfer tape side. Peel down the white backing paper about 20cm from the top.

STEP 4

Once the white backing is removed the adhesive is exposed, so be careful the design does not fold over onto itself. Press and fold the top of the white backing over (about 20cm from the top), and then rub the exposed section of the design onto the wall.

STEP 5

Continue to rub the remainder of the design onto the wall while peeling off the white backing. If your decal is large in size, ask a friend for help. Otherwise you should be able to manage the application in one step.

STEP 6

Now, start at a corner again, and slowly peel or roll the transfer tape away from the decal at a 45° angle. Continue until the transfer tape is completely removed from the wall and graphic.

DECAL REMOVAL

Aim a hair dryer at the corner of the decal while using your finger nail to lift the section away from the surface. The adhesive will release upon contact with concentrated heat. Our decals are created to be easily removed from a painted wall, so most likely you won't even need a hair dryer!

STYLE YOUR SPACE!

With the coolest backdrop in town, add those funky fresh details to really make your space pop. Colour matching the decal with a cushion or art print will create a cohesive flow and wow factor in your space. Hashtag #yourdecalshop with a photo of your decal installed to go into the draw to win free gifts!
