How to bind OPENTX Radio and ELRS SPI Receiver

Your radio needs to have the ELRS TX module installed

Open Betaflight---click Receiver---click Bind Receiver

Press and hold the Menu key to access the page

How to bind OPENTX Radio and Frsky D16 SPI Receiver

Open Betaflight---click Receiver---click Bind Receiver

Enter the MODEL SETUP Page

2 Use Betaflight Set the Flight mode

First you need to install "[betaflight.exe](#)" before we can proceed

1. After the installation is complete, open Betaflight, Connect FC to computer with USB cable

2. If the computer recognizes FC,

COM Betaflight STM32XXXX will appear in the upper right corner

Remove the propeller, Turn on Radio, power the aircraft

Tips: If your computer does not recognize FC, please use "[ImpulseRC_Driver_Fixer.exe](#)" to install the correct driver

"[ARM](#)" is to unlock the motor, to the right of "[ARM](#)", select [AUTO](#), Select a switch on the remote and press, The indicator will jump, Drag the Yellow line segment to the yellow indicator point, once you're done, Click "SAVE" in the lower right corner, This switch is set to unlock.

"[Angle](#)" mode can assist you to correct the attitude of the aircraft. If you are not familiar with Acro Mode, please enable this mode for flight

3 How to Properly Install a Propeller

Aircraft with protective rings installed, the propeller rotates outward,
And aircraft without protective rings rotate inward

No protective ring is installed

A protective ring is installed

4 Ready to take off

- 1 First, You need to secure the battery, Make sure that the battery plug will not touch the propeller. Please place the aircraft on a flat ground or a take-off platform (better use a landing pad)
- 2 Flip the "ARM" switch you set, the motors will be armed, the propellers will start turning, Then push the throttle and start flying

Caution: ⚠️

If you are operating an aircraft for the first time, stay away from crowds
If anything abnormal occurs during takeoff,
Please flip the "ARM" switch again and the propeller will stop rotating

Finally, wish you have a pleasant flight experience!
