

# AUDIO JAMMER AND SPEECH PROTECTOR SOLUTIONS

[www.tekforbiz.com](http://www.tekforbiz.com)

**Fully protect your confidentiality in business discussion**  
**Ultrasonic microphone jamming technologies**  
**No audible noise, No electromagnetic radiation**

Smartphone is a growing threat for business confidentiality.

One eavesdropping or unwanted recording can badly affect your business, even destroy your business.

Our leading audio jammer solutions fully protect your confidentiality in all kinds of business discussion scenarios.

Meeting Space

One-On-One Conversation

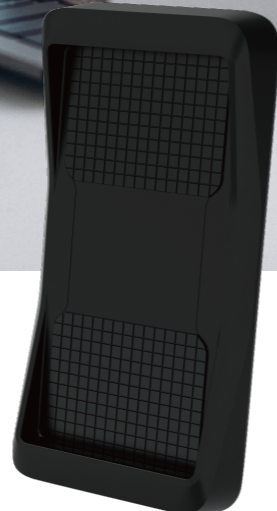

Conference Rooms

A wireless charging pad that can block cell phone eavesdropping without disturbance

# AT-331 AUDIO JAMMER ENABLED WIRELESS CHARGING PAD

## Features

### 100% Protection

Equipped with ultrasonic microphone jamming technologies to effectively block the eavesdropping APP in the cell phone with meaningless noise

### Safe and no disturbance

Ultrasonic microphone jamming technologies, no audible noise, no electromagnetic radiation  
No damage to cell phone hardware, does not block any calls, SMS and other network communication

### Easy to use

Out-of-the-box experience, place cell phone then active  
Jamming active and wireless charging indicator

### Wireless charging

10W wireless charging  
Optimized charging management and heat dissipation design to support long time working

## Specification

Jamming method	Ultrasonic interference + acoustic interference
Compatible phones	All kinds of cell phones including iPhone and Android phones
Wireless charging	10 W Max.
Indicators	Jamming active, wireless charging
Power consumption	<25W
Power supply	USB Type-c
Working temperature	14°F~ 131°F (-10°C ~ 55°C)
Dimensions	8.4" x 4.3" x 1.2" (214mm x 108mm x 30.5mm)
Weight	0.48 lbs. (219g)

## Advantages

- **Active defense** — Reduce the risk of clandestine voice recordings or eavesdropping in work and life

- **Designed for daily use** — A wireless charging pad, place cell phone then active

- **No missing call** — Does not block any calls, SMS and other network communication

## Application scenarios

# AT-332 AUDIO JAMMMER ENABLED 8 SLOTS WIRELESS CHARGING STATION

A wireless charging station that can block all cell phone recording and eavesdropping without disturbance

## Features

### 100% Protection

Equipped with ultrasonic microphone jamming technologies to effectively block the microphone of cell phones with meaningless noise  
Slotted jammer pool, supports up to 8 cell phones

### Safe and no disturbance

Ultrasonic microphone jamming technologies, no audible noise, no electromagnetic radiation  
No damage to cell phone hardware, does not block any calls, SMS and other network communication

### Easy to use

Out-of-the-box experience, place cell phone then active  
Equipped with 3.5" Touchscreen, customize warning prompts and noise easily  
Jamming active and wireless charging indicator for each slot

### Wireless charging

10W independent wireless charging per slot  
Optimized charging management and heat dissipation design to support long time

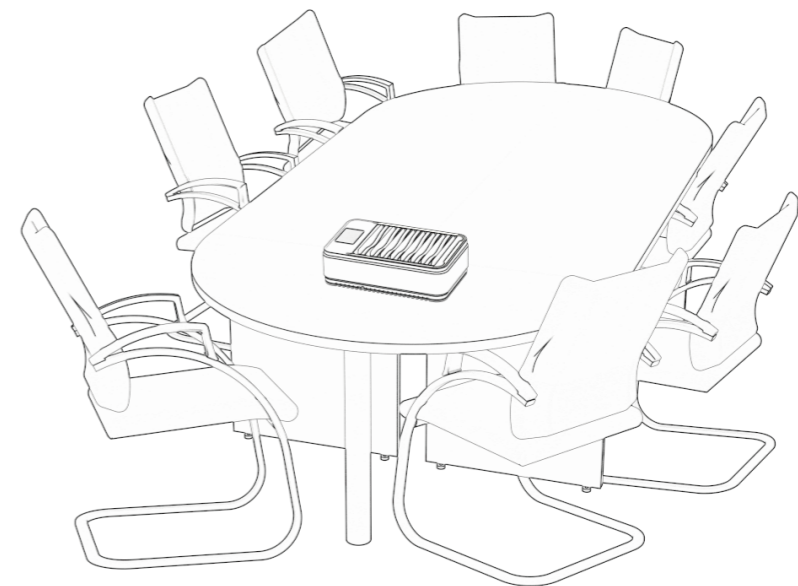

## Specification

Jamming method	Ultrasonic interference + acoustic interference
Compatible phones	All kinds of cell phones including iPhone and Android phones
Capacity	8 slots for 8 smartphones
Wireless charging	8 slots, 10W Max. for each slot
Control panel	3.5" touchscreen
Interference noise	White Noise, Pink Noise, Flowing water sound, Wave sound, Wind sound
Indicators	Jamming active, wireless charging
Power consumption	<140W
Power supply	AC 110/220V
Working temperature	14°F~ 113°F (-10°C ~ 45°C)
Dimensions	13.6" x 4.2" x 8.6" (345mm x 107mm x 218mm)
Weight	5.1 lbs. (2.3kg)

## Advantages

- **Active defense** — Reduce the risk of clandestine voice recordings or eavesdropping for all important meetings and conversations
- **Designed for business** — Support up to 8 cell phones; Put cell phones together to significantly improve the communication efficiency of the meeting
- **No missing call** — Does not block any calls, SMS and other network communication

## Application scenarios

# AT-333 AUDIO JAMMMER ENABLED PORTABLE BLUETOOTH SPEAKER

Full protect your confidentiality in business discussion with this portable and discreet device

## Features

### 100% Protection

Equipped with ultrasonic microphone jamming technologies to effectively block portable recording devices such as cell phone and digital voice recorder  
Multi-angle signal design to create a fully protected area, three-gear adjustable signal power to cover the whole conversations areas

### Safe and no disturbance

Ultrasonic microphone jamming technologies, no audible noise, no electromagnetic radiation  
Complies with relevant security and safety industry standards

### Portable

Built-in 6600mAh large capacity battery, continuous operation time with battery power up to 2 hours.

### Discreet design

It can be used as a Bluetooth speaker, jamming recording while playing music  
Easy to turn on and off the jamming function by remote controller or smartphone

## Specification

Jamming method	Ultrasonic interference + acoustic interference
Jamming radius	6 feet (2 meters)
Battery capacity	6600 mAh
Indicators	Jamming signal power level, battery capacity
Power consumption	<20W
Power supply	USB Type-c
Working temperature	14°F~ 113°F (-10°C ~ 45°C)
Dimensions	3.7" x 3.7" x 6.6" (94mm x 94mm x 168mm)
Weight	2.20 lbs. (1000g)

## Advantages

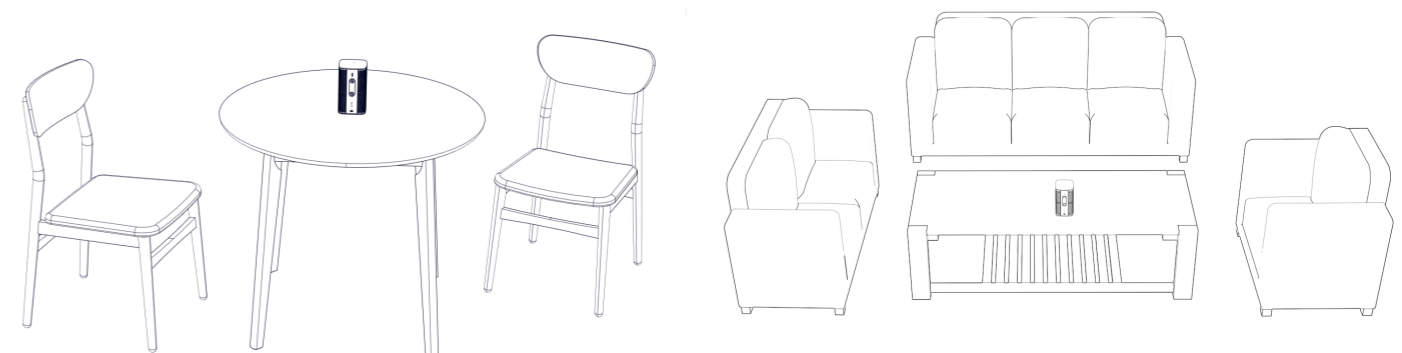

- **Active defense** — Reduce the risk of clandestine voice recording or eavesdropping for all important meetings and conversations

- **Discreet design** — Can be used as a Bluetooth speaker; Easy to turn on and off by remote controller or smartphone

- **Easy to use** — Out-of-the-box experience

## Application scenarios

# AUDIO JAMMER SOLUTION FOR CONFIDENTIAL CONFERENCE ROOM

Make your conference room to be a confidential conference room, fully protect your confidentiality in business discussion

## Features

### 100% Protection

Equipped with ultrasonic microphone jamming technologies to effectively block portable recording devices such as cell phone and digital voice recorder  
Multi-angle signal design to create a fully protected area, three-gear adjustable signal power to cover the whole conversations areas

### Safe and no disturbance

Ultrasonic microphone jamming technologies, no audible noise, no electromagnetic radiation  
Complies with relevant security and safety industry standards

### Flexible deployment

Supports all kinds of conference rooms and conference tables with flexible configuration of desktop, under-desk or wall mount equipment  
Control the whole system by a control terminal equipped with a touchscreen

### Centralized management system

Effectively manage all equipment in multiple confidential conference rooms through the centralized management system  
Provides operation and maintenance information to the security management system such

as operational status, historical usage details. Can be interfaced with the customer's existing conference management system.

## Specification

	AT-315	AT-316
Application scenario	under-desk / wall mount	Desktop
Jamming method	Ultrasonic interference + acoustic interference	
Angle of coverage	Horizontal 60°, vertical 60°	
Jamming radius	6 feet (2 meters)	
Networking interface	BLE/RS232	
Power consumption	<50w	
Power supply	AC 110/220V (AC/DC adaptor)	
Working temperature	14°F~ 131°F (-10°C~55°C)	
Dimensions	13.9" x 5" x 1" (354mm x 127mm x 26.2mm)	15.5" x 2.2" x 3.5" (395mm x 56.5mm x 90mm)
Weight	3.3 lbs. (1500g)	1.9 lbs. (860g)

## Advantages

- **Active defense** — Reduce the risk of clandestine voice recordings or eavesdropping for all important meetings and conversations
- **Designed for conference room** — Supports all kinds of conference rooms and conference tables with flexible configuration of desktop, under-desk or wall mount equipment
- **Easy to use and manage** — Wireless networked control terminal, centralized management system
