

# Dog Agility A-Frame Assembly Instructions

Thank you for your purchase! Our goal at Better Sporting Dogs is to bring fun, quality equipment to dog enthusiasts just like ourselves at a reasonable cost. Agility training is a fantastic way to train your dog both mentally and physically and deepen the bond you have with your dog. The Dog Agility A-Frame is a great way to begin training or keep up with the training you already have!

Please see the assembly instructions below. If at any point you need assistance in assembly or have any questions or concerns, we can be reached at: [support@bettersportingdogs.com](mailto:support@bettersportingdogs.com)

**\*Please note:** While this equipment is great for use both indoors and outdoors, prolonged exposure to the elements will cause it to wear out more quickly. To ensure your equipment has the longest lifespan possible, it is recommended that you store it indoors when not in use. The top of the A-Frame has a small gap where the hinge is located. Do not place anything rigid (like a piece of wood) in this gap. A pool noodle can be cut to size and placed in the gap. However, you must remove it before changing the angle of the A-Frame to avoid putting any excess pressure on the wooden boards.

## **To assemble:**

Remove the A-Frame from the packaging. Unfold the wooden boards. Use the provided silver chain and snap ring carabiners to adjust the angle and height of the A frame to your desired size.
