LAPTOP SCREEN EXTENDER

Warm tips:

1. Please ensure Type-C data cable is connected well with device interface.
2. This product supports whole function of Type-C (charging and video), integrated one line. If screen cannot be powered on or restarted, please supply external power of 5V, 2A.
3. The PD interface used to connect the product must use the HDMI TO TYPE-C data cable in the package and be externally powered.

Mac

Android

KEPEYA

Product Introduction

S1 is a plug-and-play, versatile external, portable folding single-screen laptop splitter. It allows for the quick setup of a personal mobile workstation. It provides a perfect solution for laptop users to have multi-screen mirroring or extended display, significantly boosting work efficiency by up to 50% and enabling efficient multitasking. Additionally, it supports screen mirroring on select smartphones such as Samsung and Huawei, as well as the use of the smartphone's built-in desktop mode and audio-video transmission capabilities.

The S1 product stand is designed for easy use. It can be clipped onto the top of the laptop screen, providing a secure and non-slip attachment. It supports laptop shells ranging from 13 inches to 17.3 inches, catering to professionals, white-collar workers, gamers, stock traders, entrepreneurs, programmers, and students, offering them a unique and enjoyable experience.

Each screen of S1 allows adjustment of brightness, sound, contrast and other parameters independently, and is equipped with MINI HDMI/Type-C interface, saving the need of any docking stations. As long as it is a signal + power supply two-in-one TYPE-C laptop, connected display can be realized with one cable. The desktop host/laptop/mini PC/ set-top box/game console and other devices with HDMI output interface can be directly connected to the display, but the screen needs external power supply to light up (Type-C mobile phone charging cable can be used).

Finally, S1 screen splitter can provide a complete 180 degree rotation on a single screen. You can choose your best view angle for the optimum visual experience.

How to Connect

1. Connect S1 with Laptop

It requires 1 full-featured USB-C port or 1 HDMI port plus 1 USB-A port on your laptop.

TYPE-C Connection :

If your laptop has a full-featured Type-C port, you can connect the S1 directly to your laptop with one Type-C cable.

Notice: If the display has no signal or the signal is unstable after connection, please connect an external 5V/2A power adapter to power the laptop.

HDMI & USB-A Connection:

If your laptop has USB-A and one HDMI port, please use the USB-A to USB-C cable and HDMI to Type-C cable to connect the S1.
