TAILOR-MADE AND HAND CRAFTED

Original Book Works has hand crafted beautiful faux leather books in The Cotswolds, UK for almost 30 years. A team of highly trained craftsmen produce each individual spine by hand.

Our faux book panels are authentic reproductions taken from genuine antique leather books. The process allows all the details to be faithfully reproduced without causing any damage to the original. Each spine is then individually coloured, gilded and waxed.

A BESPOKE SERVICE MADE EASY

Our Faux Books have been installed all over the world and we pride ourselves on individual support for every commission, whether it be large or small. We do all the planning and layout for you. Each project is unique.

ARCHITECTURAL

SAGE GREEN

BEAUTIFUL ILLUSIONS

The most striking quality of faux books is that they look so convincing.
When you need to create an illusion, they are the perfect disguise.

Our customers have found them invaluable not only for creating secret, hidden doors (jibs),
but also for disguising safes, radiators, TV screens and unsightly electricity cupboards.

Easy installation makes them perfect for film and theatre sets, while bars, hotels and restaurants
find they can provide essential period detail using a fraction of the expensive floorspace
a real bookcase would require.

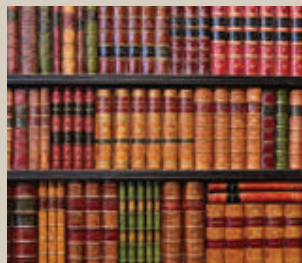

VELLUM WITH GILDING

COLOURWAY

A variety of colours are available, all of which have a beautiful antique patina. The authentic and superior finish makes our books indistinguishable from those attractive, old preserved books which are admired and envied by many.

TRADITIONAL

The look of antique leather bound books in a variety of reds, greens, blacks and tans

PASCALE

Muted tones particularly suitable for modern interiors where stylised looks are needed

ARCHITECTURAL

A mixture of our vellum, grey and traditional spines for a lighter feel

CANDIDE

A variation of the vellum finish incorporating some grey faux-book spines

SAGE GREEN

Our newest addition. All of the spines are created using brown labels and gilding.

VELLUM

A modern take on goat skin books which can have coloured labels, be gilded or left plain.

STUNNING VERSATILITY

Our faux books panels are typically presented in two different styles.

FORMAL

All books upright

INFORMAL

Some books stacked or on their sides

PERSONALISATION

Like most of our range, we are also able to offer personalised faux book spines by adding a title, name or logo to the spines.

This service has been particularly popular for car and aeroplane enthusiasts, along with hobbyists. The names of family members and favourite book titles could also be added.

PAPERBACK BOOK PANELS

We are the first and only provider of paperback book panels,
constructed from genuine guillotined books.

ORDERING AND INSTALLING

We need to know:

1. The overall dimensions (mm or inches) of the area to be covered. A plan or sketch is often useful
2. How many doors are there?
3. The height of the beading/strips of wood you're using for false shelves (so that we can provide an accurate layout)

We will then supply:

1. Panels of paperback spines are pre-mounted onto 3mm backing board. The layout of the spines will vary, with the occasional horizontal spine, made to appear as though a book has been tucked in above a row of vertical books (as shown in the images on this page)
2. We can create panels with heights ranging from 180mm to 270mm tall

When you receive your panels:

1. You'll need to supply strips of wood for your false shelves. We recommend 38mm square however, the height can vary depending on the style you're looking to create
2. The paperback panels can then just be fixed in place

PAPERBACK HIDDEN CUPBOARD

FAUX BOOK PANELS

Authentic reproductions taken from genuine antique leather books.

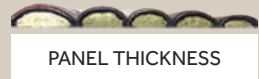

ORDERING AND INSTALLING

We need to know:

1. The overall dimensions (mm or inches) of the area to be covered. A plan or sketch is often useful
2. How many doors are there?
3. The height of the beading/strips of wood you're using for false shelves (so that we can provide an accurate layout)
4. Whether false shelves are already installed and if so, the height between them
5. The style of layout you'd like (Formal or Informal)
6. The colourway you'd like to use (Traditional, Pascale, Architectural, Candide, Sage Green or Vellum)
7. Whether any personalisation is required

We will then supply:

1. We will supply faux book panels to fit each shelf space precisely
2. Our faux book panels are between 10mm and 25mm thick (front to back)

When you receive your panels:

1. If you're securing your faux book panels to a background or door, this will need to be painted in matt black to give the impression that it's in shadow
2. You'll need to supply strips of wood for your false shelves. We recommend 25mm square however, the height can vary depending on the style you're looking to create
3. Before installing, lay out each shelf on a horizontal surface and confirm the dimensions are correct
4. When you're ready to install, use a builder's mastic (similar to 'Gripfill') if you'd like a permanent fixing. If sticking directly to a vertical surface, an application of hotmelt glue may be required to hold the panel in place whilst the mastic cures
5. If you'd prefer your panels to be free standing on open shelves, we can supply L brackets to hold them upright. We would advise filling an entire length of your open shelf in order to create a realistic look

MIXED BOOK PANELS

A combination of traditional, hardback and paperback spines, replicating a modern bookcase.

A more and more popular alternative for our customers, to just mixed paperback and traditional spines.

We incorporate hardback and Vellum spines to create the modern day look of a domestic bookcase.
Works incredibly well, especially in a faux book door.

We send it to you on a 3mm backing board, so you don't have to worry about assembly.
Just affix the panel to your surface, in the order of the plan we send you.
