

# CLIMBING WALL

## User Manual

### Let the Climbing Begin!

You've made an awesome choice—your new Climbing Wall is here and ready to bring hours of fun, movement, and adventure! Designed especially for kids, it's perfect for boosting confidence, coordination, and creativity, all while having a blast. Whether it's a quick climb between homework or a full-on indoor adventure, this wall encourages active play in a safe and exciting way. It's not just a piece of equipment— it's a gateway to imagination, exploration, and achievement.

So get ready to climb higher, smile bigger, and make every day a little more fun!

### WARNING:

Prior to assembly this package contains small parts, sharp points and sharp edges.  
The product is to be assembled by an adult; keep away from children until assembled.

# Climbing Wall User Manual

## Assembly Parts

No	Parts	Qty
A	Board	x3
B	Chalkboard	x1
C	Climbing holds	x12
D	Screws (to mount to wall)	x16
E	Allen bolts (to attach holds)	x12
F	Mini screws (to secure holds)	x12
G	Mini hex	x1

### Required Tools for installation:

- Stud Finder
- Measuring Tape
- Level
- Drill
- Screwdriver or Screw Gun

### Additional Tools:

- Chalk (for writing on the black board)
- Scissors
- Duck tape

## Product Overview:

This climbing wall is designed for children aged 3 years and older and can safely hold up to 60kg. Product is designed to be used by 1 kid at a time. Note that adult supervision is compulsory while children of all ages uses the equipment. It is intended for installation on a wooden wall or drywall with wooden studs.

**FOR INDOOR USE ONLY**

# Climbing Wall User Manual

## Installation

Use a stud finder to locate the wooden studs in your wall and mark them

Position the first board A on the wall, aligning it with the studs.

Use predrilled holes on the board according to your wall studs spacing.

Use a level to ensure the board is straight before you install it.

Secure the board A to the wall with the provided screws D, drilling them to the wall.

# Climbing Wall User Manual

## Installation

Repeat Step 3 for the remaining two wood boards A, ensure they are leveled and aligned.

Above the wooden boards A, mount chalkboard B

Use **mini hex G** to install holds C with bolts E. Repeat this step until all holds are attached

Once holds are attached, use **mini screws F** to further secure holds in place. Repeat this step until all holds are secured.

### At the beginning of each play season:

- Tighten all hardware;
- Check metal parts for rust. If found, sand and repaint using a nonlead-based paint;
- Check all wood members for deterioration and splinters. Sand down splinters and replace deteriorating wood members;
- Reinstall any plastic parts, such as swing seats or any other items that were removed for the cold season;
- Twice a month during play season tighten all hardware.

### Safety Precautions:

- Ensure the wall can support the weight of the climbing wall and climbers;
- Supervise children at all times while they are using the climbing wall;
- Regularly check all screws and holds for tightness and wear;
- Place the equipment on level ground, not less than 6 ft (1.8m) from any structure;
- Do not install home playground equipment over concrete, asphalt, packed earth, grass, carpet, or any other hard surface. A fall onto a hard surface can result in serious injury or death to the equipment user.

#### Final Checks:

Ensure all boards and holds are securely attached. Test each hold to make sure it is firmly in place and can support weight. Ensure there is adequate padding below the climbing wall to cushion any falls.

#### Maintenance Tips:

Check and tighten all screws periodically. Clean the holds and boards regularly to maintain a good grip. Replace any worn-out holds or damaged components immediately.

#### Safety Recommendations:

Parents or a supervising adult must ensure children do not use the equipment in a manner not specified in this instruction manual. Parents or a supervising adult must not allow children to wear inappropriate items while using the equipment, such as but not limited to, loose fitting clothing, hood and neck drawstrings, scarves, cord-connected items, capes and ponchos. These items can cause death by strangulation. Parents or a supervising adult must instruct children not to climb when the equipment is wet. Parents or a supervising adult must instruct children not to attach items to the Climbing Wall that are not specifically designed for use with the Climbing Wall, such as, but not limited to, jump ropes, clothesline, pet leashes, cables and chain as they may cause a strangulation hazard. Parents or a supervising adult needs to ensure children remove bike/sports helmet before playing on the Climbing Wall.

#### Note for Installation on Non-Wooden Walls:

If you wish to install the climbing wall on a different type of wall (e.g., concrete, brick, etc.), you carry the responsibility for ensuring safe installation. It is recommended to consult with a specialist and purchase special screws and anchors designed for the specific wall type you are planning to use. By following these instructions, you can ensure a safe and enjoyable climbing experience for your children. If any doubt please contact CFBY team.

**NOTE** - Children cannot use equipment until properly installed. Installation must be done by a parent or guardian. Children of all ages should use the Climbing Wall only under the supervision of parents. Use of a thick padding is compulsory to avoid injuries from falls.

Please adhere strictly to the instruction manual provided for the correct and intended usage of our Climbing Wall. You bear sole responsibility for ensuring the appropriate use of the product. Under no circumstances shall we be held liable for any direct, indirect, special, incidental, or consequential damages arising from or related to the use or misuse of the product. User shall be responsible for maintaining the legibility of the warning labels. Kindly save these instructions in the event you need to contact the manufacturer.

Supervising adult or parent must ensure children wear well-fitting and fully-enclosing footwear while using the Climbing Wall. Examples of inappropriate footwear would be slugs, flip flops, and sandals. The climbing wall must be installed so that the top of the board is no higher than 2.60 meters above the floor. When the Climbing Wall use is no longer desired, it should be disassembled and disposed of in such a way that no unreasonable hazards will exist at the time the unit is discarded.

Happy climbing!

Enjoy your climbing  
experience and always  
stay safe

## Climbing Wall Protective Surfacing Guidelines

**Select Protective Surfacing**—One of the most important things you can do to reduce the likelihood of serious head injuries is to install shock-absorbing protective surfacing under and around your Climbing Wall. The protective surfacing should be applied to a depth that is suitable for the Climbing Wall height in accordance with ASTM Specification F1292. Accordingly, you may choose from various surfacing options for any product selected. Please follow the guidelines provided below for the type of surfacing chosen:

- 1) The Climbing Wall is meant to be used Indoors, hence it is not recommended to use loose fill materials.
- 2) If you use protective surfacing, a minimum of 6 in. (152 mm) of protective surfacing for play equipment less than 48 in. (1219 mm) in height. If maintained properly, this should be adequate. At depths less than 6 in. (152 mm), the protective material is too easily displaced or compacted.
- 3) Use containment, such as a soft and thick padding.
- 4) Do not install loose fill surfacing over hard surfaces such as concrete or asphalt.  
Note : Do not install home playground equipment over concrete, asphalt, or any other hard surface. A fall onto a hard surface can result in serious injury to the equipment user. Carpeting and thin mats are generally not adequate protective surfacing.
- 5) You may be interested in using surfacing other than loose-fill materials – like rubber tiles or poured-in-place surfaces and ensure these surfacing is in accordance with the following guidelines, –
  - A) Installations of these surfaces generally require a professional and are not “do-it-yourself” projects.
  - B) Review surface specifications before purchasing this type of surfacing. Ask the installer/manufacturer for a report showing that the product has been tested and complies to the following safety standard: ASTM F1292 Standard Specification for Impact Attenuation of Surfacing Materials within the Use Zone of Playground Equipment. This report should show the specific height for which the surface is intended to protect against serious head injury. This height should be equal to or greater than the fall height – vertical distance between a designated play surface (elevated surface for standing, sitting, or climbing) and the protective surfacing below – of your Climbing Wall.
  - C) Check the protective surfacing frequently for wear.

**Placement**—Proper placement and maintenance of protective surfacing is essential. Be sure to:

- A) Extend surfacing at least 72 in. (1829 mm) from the Climbing Wall in all directions.

Maximum Fall Height of Climbing Wall : 70.8 inches

### **WARNING:**

**CHOKING HAZARD** - Small parts.  
Not for children under 3 yrs.

# ComfyBumpy Climbing Wall Packaging user Manual

## Climbing Wall

This user manual will show you how to add more fun to your climbing experience

1

- On the back of the box you will find face masks forms and additional attributes of stars and arrows.

2

- Follow and carefully cut along the lines with scissors to get masks, bear, arrows and stars shapes.
- Let your kids unleash their creativity with crayons, colored pencils, and markers by coloring shapes!

3

- Now it is time to decorate your Climbing Wall with arrows and stars! They will guide you to reach your top achievements!
- To have more fun – add elastic to your face mask and wear it as you climb! You can be a brave ComfyBumpy bear or even a super hero!

### Safety Precautions

Always supervise children while cutting out shapes and during playtime to prevent accidents. Ensure that scissors are always used safely and responsibly.

Active your warranty and claim your surprise gift from us here!

Enjoy your climbing experience and always stay safe
