Transportation Emergency Telephone: US & North America: 1800 424-9300  
International: (703) 527-3887

Product Class: Hair Dye

Product Commercial Name: **TIGI Colour**

Product Identification: association of colorants in various forms (gel or cream) in basic environment (Part I). At the time of use, the product is mixed with a hydrogen peroxide-based oxidising product (Part II).

---

### Section 02 – Identifications of Hazards

---

The Methods of use and warnings are shown on the product package.

When used following the manufacturer's instructions, the product is considered safe for the environments and humans, within its category, and except for cases of individual hypersensitivity to one or more of the ingredients in the formulation.

The following information applies in the case of improper use or accident.

The use of gloves is recommended and especially if the product is used frequently by professionals in hairstyling salons [PPE Directive (Personal Protective Equipment)].

Repeated skin exposure may cause skin rash due to irritation and/or allergic reaction.

Irritating if swallowed and/or in accidental contact with eyes or mucous membranes in general.

Excessive inhalation or vapours can irritate the respiratory tract.

---

### Section 03 – Physical/ Chemical Characteristics

---

**Appearance:** cream-gel (Part I) / liquid-emulsion (Part II)

**Odor:** Characteristic (Part I/Part II)

---

### Section 04 – Fire Fighting Methods

---

Non-flammable product. In case of fire, use atomized water, foam, chemical power or carbon dioxide.

---

## Section 05 – Stability and Reactivity

---

Product stable at ordinary temperatures and under the indicated storage conditions

---

## Section 06 – First Aid Measures

---

Measures in the case of:

Contact with the eyes: Remove contact lenses, immediately flush eye with plenty of lukewarm water; if irritation persists, contact a poison center or seek medical advice.

After swallowing: Do not induce vomiting. If the severity of the symptoms requires it, contact a poison center or seek medical advice.

Contact with the skin/mucosa: Immediately wash with plenty of water. If irritation persists, contact a poison center or seek medical advice.

Massive inhalation of vapours: take the person outside. If illness persists, contact a poison centre or seek medical advice.

---

## Section 07 – Accidental Release Measures

---

Collect the spilled product using sand and sawdust where possible, and put into suitable containers for disposal according to the law. Wash the contaminated area with water. Never put spilled product back in the original container. Do not use spilled product.

---

## Section 08 – Handling and Storage

---

### Handling

- Do not use for any purpose not described in the instructions.
- Avoid colouring lashes and eyebrows.
- Do not perform a permanent immediately before or after colouring.
- Rinse well after application.
- Do not use on hair previously treated with metallic dyes.
- Follow the recommended processing times.
- Immediately rinse any colouring residue deposited on skin or clothing.
- Use the colour mixture immediately.
- Dispose of any unused colour mixture.
- Do not leave the colour mixture in a hermetically-sealed container because it could swell and explode.
- Avoid mixing with other products, similar products or products with substances other than those specified in the instructions.
  - Never put spilled product back in the original container for reuse.
  -

---

## Section 08 – Handling and Storage (Continued)

---

### Handling

- Avoid product contamination during use.
- Apply the product in a well-ventilated area.
- Keep out of the reach of children.

### Health Warning:

- Do not apply if the scalp is damaged, irritated or affected by disease (eczema, psoriasis, etc.).
- Since the product can cause an allergic reaction in prone people, it is advisable to perform a preliminary tolerability test, as described below: use alcohol to clean a 1-cm<sup>2</sup> area of skin behind the ear, or on the inside of the forearm; mix approx. 5g of product with approx. 5g of oxidant (Part II); with a cotton swab or a small spatula apply a sufficient amount of product to cover the prepared area; repeat the application 2 or 3 times and let dry between applications; cover with a band-aid and wait 48 hours without washing; if the consumer experiences itching or redness during this period, do not apply the product. In any case, it is up to the consumer to decide whether or not to perform the preliminary tolerability test (patch test). Hairdressers must refrain from expressing a conclusive evaluation of the results of the patch test.
- Caution, the final product may generate hydrogen peroxide.
- Continuous exposure to detergents (soap, shampoo, liquid detergents), for professional reasons, may deplete the hydrolipidic film and horny layer that constitute the skin's natural barrier. The depletion of this barrier could cause skin lesions and exposure to external agents. Under these conditions, handling other products normally used during professional activities without proper precautions may cause intolerance that, in the long-term, could lead to serious irritation and allergies.

### Storage

- Store in a dry, well-ventilated area (at room temperature). Do not store or use the product near open flame, sources of heat, operating electrical equipment or in direct sunlight. Do not store the product at a temperature lower than 5 °C or above 30 °C. Close the container tightly after use.

---

## Section 09 – Personal Protection / Exposure Control

---

If an employer identifies risks that are not avoidable through other means, it is required to provide adequate Personal Protective Equipment (PPE). The use of PPE provided by the employer is obligatory. In the Specific Case:

- at present the company has not received reports of any adverse reactions or sensitivity;
- during all phases of application, handling and rinsing, use disposable plastic gloves that cover the forearms;
- use carefully-cleaned work instruments;
- avoid instruments containing nickel;
- Do not wear jewellery.

The work environment must be adequately ventilated and, if necessary, using forced mechanical replacement of the air. Areas in which the emission of vapours, gas, dust or spills of hazardous substances can occur must be separated and equipped with local extraction or collection systems

---

## Section 10 – Information for the Protection of the Environment

---

Dispose in accordance with local state and federal regulations.

---

## Section 11 – Regulatory Information

---

These finished cosmetic products are manufactured and sold in conformity with Law 713/1986 and subsequent modifications.

Cosmetic products are specifically excluded from the field of application of Italian and Community laws on hazardous preparations.

The need to subject workers to a health-monitoring program (pre-hire and periodic medical examinations) must be evaluated by the doctor in charge on the basis of the Risk Evaluation Document and specific knowledge of the risk situation.

Workers are obligated to submit to health monitoring required by the doctor in charge.

---

## Section 12 – Other Information

---

DISCLAIMER: This MSDS is intended to provide a brief summary of our knowledge and guidance regarding the use of this material. The information contained here has been compiled from sources considered by the manufacture to be dependable and is accurate to the best of the Company's knowledge. It is not meant to be an all-inclusive document on worldwide hazard communication regulations.

This information is offered in good faith. Each user of this material needs to evaluate the conditions of use and design the appropriate protective mechanisms to prevent employee exposures, property damage or release to the environment. The Manufacture assumes no responsibility for injury to the recipient or third persons or for any damage to any property resulting from misuse of the product.
