

10 inch MHL Micro USB B Male to VGA Female, Micro USB B Female & Stereo Female Adapter

AD-MHL-03 - Specifications

Description

This adapter consists of a 10 inch Micro USB B male on one end and a VGA female, Micro USB B female, and a Stereo Female on the other ends. It is typically used to join a mobile device to a VGA display.

Please note that not all cellular phones contain the necessary hardware and/or software capabilities to output audio/video through their USB port. Please consult your manual or cell phone manufacturer to verify compatibility with MHL adapters/cables before purchasing.
