

Active HDMI High Speed Cable - 4K@60Hz - 18Gbps - YUV 4:4:4 - HDR - CL3/FT4

HDMI-140-xxAK - Specifications

Description

This active High-Speed HDMI® cable consists of a HDMI male connector on both ends. The cable has a built in active signal booster which allows it to maintain a HDMI 2.0 signal over a thin cable at longer lengths with no signal loss. It is typically used to connect a HDMI source such as Blu-Ray players and PC's to a HDTV or monitor and supports ultra HD resolutions up to 4k x 2k and works with splitters, switches and other video sharing devices.

NOTE: This active HDMI® cable is directional, each connector has a marking to indicate whether it should be connected to the source or the display. Always test the connection before installing the cable within a wall.
