

# 6.5" 2-Way Frameless Ceiling Speaker, 100W Max (Pair)

## SPK-C6-FLD - Specifications

### Description

This 2-way in-ceiling speaker has a 6.5" woofer and has a frameless design with a magnetic grille. The woofer is made of polypropylene and has a 0.50" mylar dome tweeter which provides high quality, long-lasting and smooth sound over a wide area. As well, there is a +/- 3dB adjustment to further customized the listening experience. Installation is quick and easy as each speaker comes with a cutout template for post construction installation. The speakers are secured with swing-out dog legs and can be installed in both residential and commercial applications. This 2-way in-ceiling speaker can be used in indoor environments. It is able to pivot to direct sound at listeners while offering high quality, long-lasting sound over a wide area. It can be used in residential and commercial applications.
