

INFINI[®]
PREMIUM FILLER

INFINI[®]

PREMIUM FILLER

INFINI Premium Filler:

- Pharmaceutical quality and state-of-the-art technology providing exceptional viscoelasticity and lasting product resorption confirmed by clinical data.
- Safety of use confirmed by certificates: CE 0373, ISO 13485, ISO 22716
- Maximum skin tolerance and biocompatibility through the use of hyaluronic acid of non-animal origin, not requiring skin testing.
- Lasting effects 6-10 months confirmed by clinical data.
- Easy and precise implantation resulting from high plasticity and smoothness of the products.
- Immediate and exquisite volumetric effects with minimal application amount of product.
- Wide range of fillers allowing to obtain satisfactory results based on individual skin needs.
- Guarantee of using the best product in terms of quality and safety of the product confirmed by clinical data.

Soft Lips

LIP FILLER GEL
BASED ON CROSS-LINKED
HYALURONIC ACID
(20mg/ml)

INFINI Premium Filler Soft Lips is a specialized gel of cross-linked hyaluronic acid designed to gently increase the volume of the lips and to deeply moisturize. Its extremely light and malleable formula gives a natural and smooth effect.

The product is dedicated for a gentle volumetric correction of lips and levelling wrinkles around the mouth. The visibility and durability of the effect depends on the depth of application and the original condition of the skin. The effect of tissue enhancement lasts about 4-6 months.

TREATMENT INDICATIONS:

- correction of shallow lines and fine wrinkles around the mouth
- shaping and filling the lips
- refreshing the lips, adding subtle volume

S

FILLING GEL BASED ON CROSS-LINKED
HYALURONIC ACID
(20mg/ml)

INFINI Premium Filler S is an ultra-plastic gel of cross-linked hyaluronic acid designed for implantation in shallow wrinkles and moderate skin defects. The product is dedicated mainly to correct the glabella, wrinkles around the mouth and eyes, as well as the neck, hands or the tear through. The product ensures natural volumetric correction by increasing the volume of the tissue, which results in the tissue being accentuated to the desired result. The visibility and longevity of the effect depends on the depth of administration and the original condition of the skin.

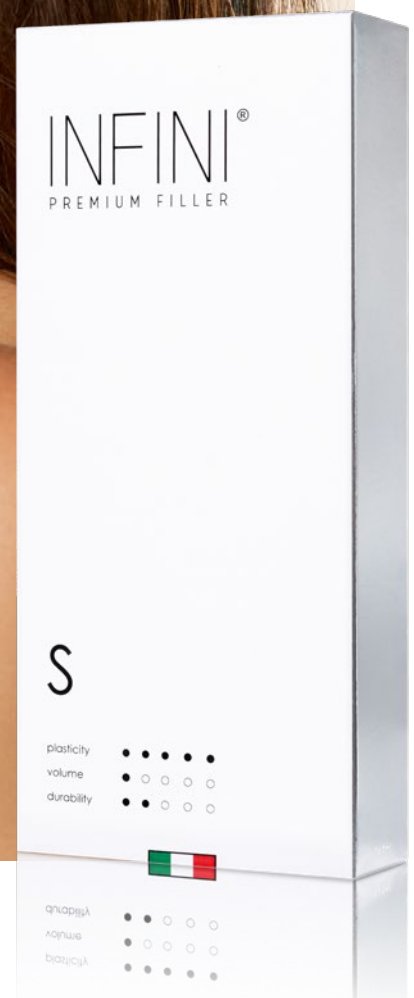

When injected into the skin, INFINI Premium Filler S increases tissue volume and fills the skin defect to be corrected. The volume and smoothing effect is due to the high content of cross-linked hyaluronic acid and its ability to bind water. The product is gradually resorbable and the effect of tissue accentuation lasts about 6-8 months and weakens over time. Regular supplementary treatments allow to consolidate the effect of the correction.

TREATMENT INDICATIONS:

- correction of shallow lines and delicate wrinkles
- revitalization of wrinkles around the eyes
- lip refreshing with gentle volume
- correction of wrinkles around the mouth
- leveling wrinkles of the glabella
- biocomplementation of hand skin
- correction of neck wrinkles

CE

M

FILLING GEL BASED ON CROSS-LINKED
HYALURONIC ACID
(21mg/ml)

INFINI Premium Filler M is ultra-smooth gel of cross-linked hyaluronic acid for increasing soft tissue volume and correcting medium and deep wrinkles. The product is also dedicated to modeling contours and filling the volume of the lips, as well as correcting soft tissue defects within the mouth such as: vertical wrinkles around the mouth, puppet lines and drooping corners. The high plasticity and smoothness of the preparation makes it suitable for lip modeling with modern surface techniques.

When injected into the skin, INFINI Premium Filler M increases tissue volume and fills the skin defect to be corrected. The volume and smoothing effect is due to the high content of cross-linked hyaluronic acid and its ability to bind water. The product is gradually resorbable and the effect of tissue accentuation lasts about 6-8 months and weakens over time. Regular supplementary treatments allow to consolidate the effect of the correction.

TREATMENT INDICATIONS:

- contouring and increasing the volume of lips
- flat lip modeling and working with modern techniques
- lifting the corners of the mouth
- correction of medium and deep wrinkles
- filling the nasolabial folds
- leveling the puppet lines
- biocomplementation of the hand skin

L

FILLING GEL BASED ON CROSS-LINKED
HYALURONIC ACID
(24mg/ml)

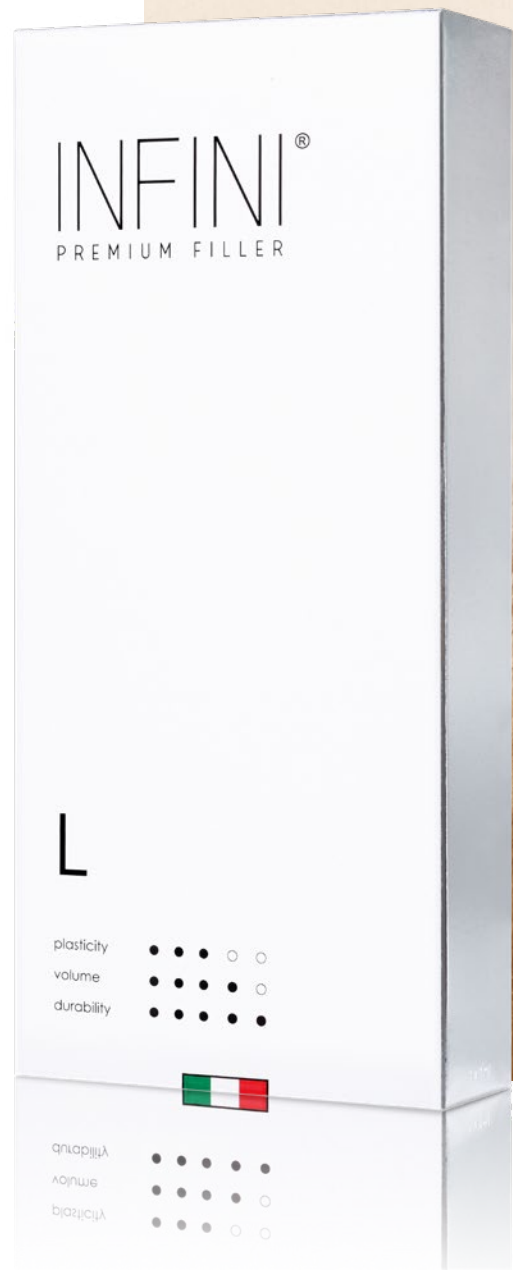

INFINI Premium Filler L is an ultra-smooth gel of cross-linked hyaluronic acid for restoring or increasing the volume of soft tissues and correcting deep wrinkles and skin grooves. The product is also dedicated to contouring face shapes in areas such as: mandible line, bridge of the nose, chin or nasolabial fold and puppet lines. The gel ensures visible volumetric correction by increasing the volume of the tissue, which results in the tissue being accentuated to the desired degree. The visibility and longevity of the effect is dependent on the depth of administration and the original condition of the skin.

When injected into the skin, INFINI Premium Filler L increases tissue volume and fills the skin defect to be corrected. The volume and smoothing effect is due to the high content of cross-linked hyaluronic acid and its ability to bind water. The product is gradually resorbable and the effect of tissue accentuation lasts about 6-8 months and weakens over time. Regular supplementary treatments allow to consolidate the effect of the correction.

TREATMENT INDICATIONS:

- correction of deep wrinkles and nasolabial folds
- puppet lines
- correction of the nose shape
- contouring the mandible line
- improving the chin shape
- contouring and increasing the volume of lips

CE

XL

FILLING GEL BASED ON CROSS-LINKED
HYALURONIC ACID
(26mg/ml)

INFINI Premium Filler XL product is dedicated to contouring face shapes in areas such as: mandible line, bridge of the nose, chin or cheek volumetry. INFINI Premium Filler XL ensures visible volumetric correction by an outstanding increase in the volume of the tissue, which results in the tissue being accentuated to the desired degree. The visibility and longevity of the effect is dependent on the depth of administration and the original condition of the skin. When injected into the skin, INFINI Premium Filler XL increases tissue volume and fills the skin defect to be corrected. The volume and smoothing effect is due to the high content of cross-linked hyaluronic acid and its ability to bind water. The product is gradually resorbable and the effect of tissue accentuation lasts about 6-8 months and weakens over time. Regular supplementary treatments allow to consolidate the effect of the correction.

TREATMENT INDICATIONS:

- increasing cheek volume
- modeling and contouring the face
- correction of the nose shape
- contouring the mandible line
- chin volumetry
- correction of very deep wrinkles

B BODY

FILLING GEL BASED ON CROSS-LINKED
HYALURONIC ACID
(20mg/ml)

INFINI PREMIUM FILLER B BODY is a gel of cross-linked, highly concentrated hyaluronic acid dedicated to restoring or increasing the volume of soft tissues and modeling the body surface. It is perfect for adding youthful volume to the body as well as treating inequalities created after liposuction treatments and volumetric body treatments.

Designed for contouring the silhouette in areas such as buttocks, calves, or hands. INFINI Premium Filler B Body provides a visible volumetric correction by adding long lasting shape and volume to the tissue. INFINI Premium

Filler Body unique properties allows practitioners to create enhancements to the tissue achieving client goals. Visibility and durability of the effect depends on the depth of application and the original condition of the skin. INFINI Premium Filler B Body injected into the skin increases the volume of tissue and fills the corrected skin defect.

INFINI Premium Filler Body is a sterile, single-phase, polymeric filling gel of cured non-animal hyaluronic acid. INFINI Premium Filler Body I is a transparent and non-pyrogenic hydrogel with corrective properties, characterized by very high viscoplasticity and high tissue biocompatibility. The product has physiological pH and osmolarity and gradual resorption.

TREATMENT INDICATIONS:

- giving volume to flabby skin
- body shaping and contouring
- buttocks enlargement
- calf shape correction

*the product is NOT allowed
for breast implantation!

A AQUABOOSTER

REVITALIZING BOOSTER BASED ON
CROSS-LINKED HYALURONIC ACID
(20mg/ml)

INFINI Premium Filler AQUABOOSTER biorevitalising skin booster which actively promotes revitalisation and rejuvenation. The uniqueness of the product lies in the use of uniquely stabilised hyaluronic acid chains, which not only ensures immediate rejuvenation and hydration of the skin, but also visible improvement in tension and density. Aquabooster restores natural volume and creates a smoothing effect by using high concentrations of soft cross-linked hyaluronic acid with a slow metabolic process. INFINI Aquabooster's unique formulation of high concentration hyaluronic acid ensures in-depth reconstruction of the skin structure and visible effects after just one treatment.

INFINI Premium Aquabooster is a revitalising booster based on stabilised hyaluronic acid (20mg/ml, 2x1ml) that provides immediate rejuvenation and hydration of the skin. The use of an outstandingly content of hyaluronic acid provides a deep regeneration of the skin structure and excellent results after just one treatment.

INFINI Premium Aquabooster is a sterile, viscoelastic, clear, colorless, transparent, isotonic, and biodegradable biorevitalising product based on cross-linked hyaluronic acid of non-animal origin, intended for needle mesotherapy treatments. The Aquabooster is a transparent and non-pyrogenic hydrogel with strong moisturising and rejuvenating properties, characterised by viscoplasticity and short biodegradability time.

TREATMENT INDICATIONS:

- numerous shallow lines and wrinkles
- progressive aging of the skin
- significant dehydration of tissues
- extreme dryness of the skin
- gray and dull skin
- visible photoaging
- revitalization of wrinkles around the eyes
- lip refreshing
- correction of wrinkles around the mouth
- leveling the glabella wrinkles
- revitalization of hand and neck skin
- 4 treatments within 3 weeks

BioAgePeel **P**

ALL YEAR BIOREVITALIZING PEELING

Medical Device Class II

BioAgePeel is an innovative, medical & chemical stimulator based on trichloroacetic, kojic and mandelic acid. The product's action is based on deep stimulation of the skin without damaging the outer layers of the epidermis. The intensive process of skin revitalization takes place without the effect of exfoliation and damage to the photoprotective structures of the skin, making the treatment safe for the whole year.

The combination of product components activates the Skin Stress Response System (SSRS) and triggers biologically active peptide hormones, including beta-endorphins - acting as skin stimulators for fibroblasts, keratinocytes and glycosaminoglycans. The preparation intensifies epidermis proliferation, multiplication of skin support fibers and endogenous hyaluronic acid, as a result of which the skin becomes visibly tense and rejuvenated. Additionally, the product promotes the growth factors of the epidermis, which are fundamental for proper trophism and appearance of the skin, as well as the growth factor of the vascular endothelium, which is important for proper metabolism and blood supply to the skin. As a result of **BioAgePeel**, the skin becomes visibly younger, tighter and more toned and the symptoms of ageing are effectively reduced.

TREATMENT INDICATIONS:

- intensification of effects of other aesthetic procedures
- chronological ageing of the skin
- photo aging
- wrinkles and sagging of the skin
- discoloration and pigmentation stains
- acne and its consequences
- scars
- enlarged pores and uneven skin structure
- abnormal skin tone

ADVANTAGES OF BioAgePeel TREATMENT:

- high effectiveness and immediate effect
- multilevel and selective skin stimulation
- high TCA content with maximum skin tolerance
- no frosts, exfoliation and convalescence time
- painless and safe
- can be combined with other treatment protocols
- dedicated for all skin types and age groups
- year-round treatment
- medical device class II
- suitable for all ages
- fast absorbing

INFINI Premium Filler BioAgePeel is a complex of biologically active acid substances:

Trichloroacetic acid [carboxylic acid] 30%

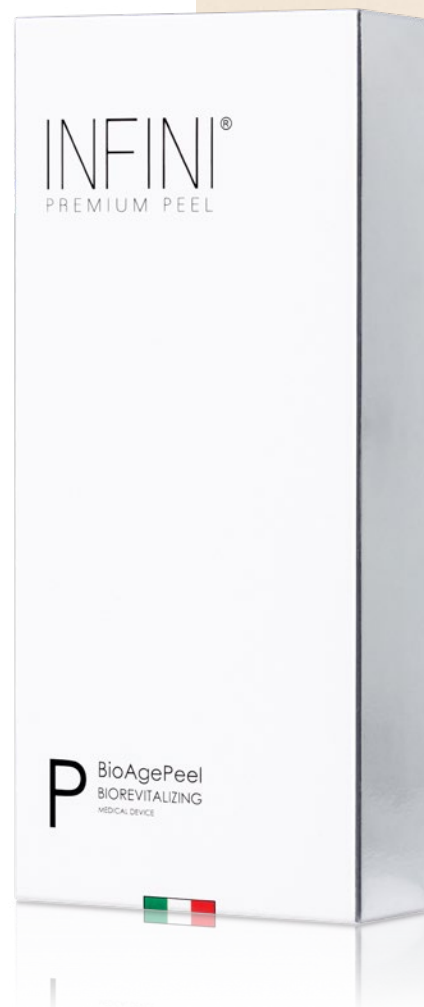

- Excellent improvement in the tonicity, the gloss and the smoothness of the skin
- Great action on cutaneous dyschromia and on acneic lesions
- It is used against superficial keratosis and first signs of aging (fine lines, dullness, photoaging)

Kojic acid [alpha-hydroxyacid] 4%

- High whitening and depigmenting action
- Excellent inhibitor of melanogenesis
- It is used in melasma, chloasma, senile lentigo, solar lentigo and dark circles treatments.

Mandelic acid [alpha-hydroxyacid] 5%

- Great action on superficial wrinkles
- Brightening action on dull skin
- Acne prevention thanks to its anti-bacterial property
- Depigmenting action that works on skin blemishes caused by photoaging
- It treats pimples and comedones signs

PREMIUM MESO **S**

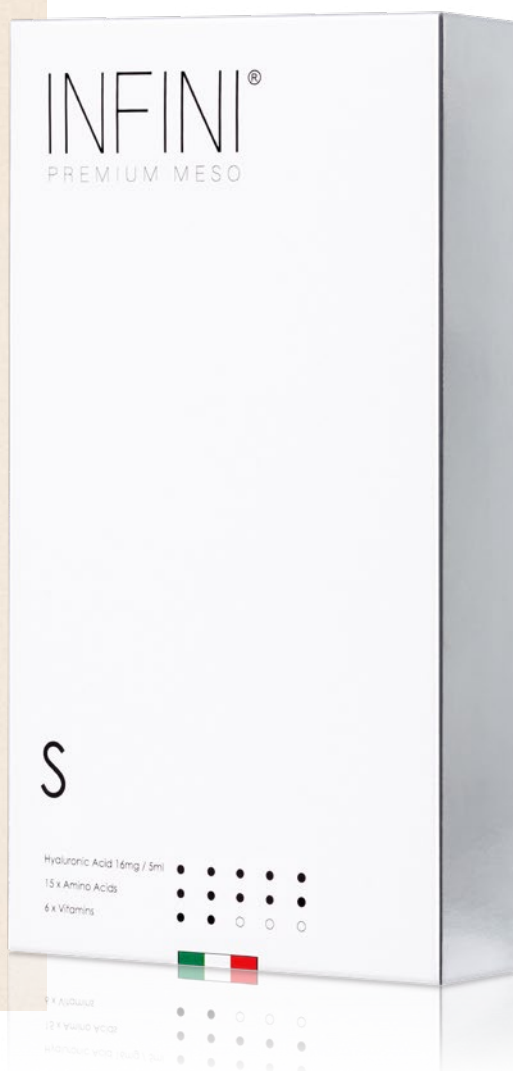

Hyaluronic Acid **32mg/10ml, 3,2mg/1ml**
+ 17 amino acids, 6 vitamins

A treatment cocktail dedicated to anti-aging and anti-wrinkle protection of the skin. Multi-ingredient formula, enriched with hyaluronic acid to moisturize, improve colour and maintain young and luminous skin. Dedicated for skins in good condition and as a therapy supporting the effects of other aesthetic treatments.

HYALURONIC ACID: 32mg/10ml

17 AMINO ACIDS: Alanine, Histidine, Isoleucine, Arginine, Proline, Glycine, Leucine, Lysine, Methionine, Thiamine, Phenylalanine, Serine, Threonine, Valine, Tryptophan, Glutamine, Adenosine

6 VITAMINS: Biotin, Niacinamide, Pyridoxine, Thiamine, Inositol, Cyanocobalamin

PREMIUM MESO **M**

Hyaluronic Acid **64mg/10ml, 6,4mg/1ml**
+ 17 amino acids, 6 vitamins

Multi-ingredient rejuvenating formula dedicated for skin with moderate signs of ageing. This meso cocktail enriched with hyaluronic acid is designed to quickly improve skin hydration and firmness, as well as to eliminate the first wrinkles and signs of ageing.

INFINI Premium Meso M is composed of hyaluronic acid and a rejuvenating complex, injectable by micro-injections into the superficial dermis of the face to treat: fine lines and wrinkles, dehydrated skin and lack of skin density and radiance. INFINI Premium Meso M helps to delay the appearance of wrinkles and increases hydration, glow, and radiance.

Amino acids and trace elements activate the regeneration of tissues and restore the epidermal barrier. Vitamins provide antioxidant activity and protection of the skin. The skin will be refreshed, have a rested appearance, and begin to radiate health from the inside.

HYALURONIC ACID: 64mg/10ml

17 AMINO ACIDS: Alanine, Histidine, Isoleucine, Arginine, Proline, Glycine, Leucine, Lysine, Methionine, Thiamine, Phenylalanine, Serine, Threonine, Valine, Tryptophan, Glutamine, Adenosine

6 VITAMINS: Niacinamide, Pyridoxine, Thiamine, Inositol, Cyanocobalamin, Biotin

PREMIUM MESO **L**

Hyaluronic Acid **150mg/10ml, 15mg/1ml**
+ 10 Amino acids

INFINI Premium Meso L is an advanced anti-ageing cocktail dedicated to the most advanced skin ageing symptoms. It redensifies the skin for a plumping effect. The skin naturally appears softer and brighter thanks to the anti-aging properties of Hyaluronic acid in particular. The highest concentration of hyaluronic acid enriched with a complex of amino acids allows for intensive regeneration of the extracellular matrix, deep stimulation of collagen and elastin and quick restoration of the youthful appearance of the skin.

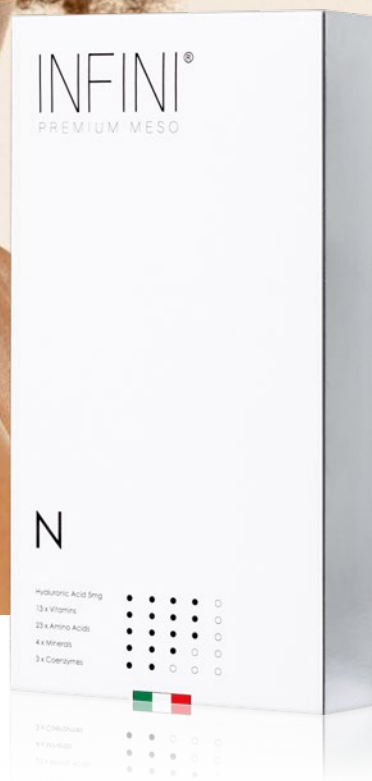

HYALURONIC ACID: 150mg/10ml

10 AMINO ACIDS: Alanine, Histidine, Isoleucine, Arginine, Leucine, Methionine, Phenylalanine, Threonine, Valine, Tryptophan

STERILE DEVICE

PREMIUM MESO **N**

Hyaluronic Acid **0.25mg/10ml**
+ 13 Vitamins, 23 Amino acids, 4 Minerals, 3 Coenzymes

PREMIUM MESO **N_{HA}**

Hyaluronic Acid **50mg/10ml**
+ 13 Vitamins, 23 Amino acids, 4 Minerals, 3 Coenzymes

INFINI Premium Meso N & Meso NHA actively repairs the skin to replace minerals that are deficient such as Magnesium, Sodium, Potassium and Calcium. Also with pure hyaluronic acid, it gives instant results to improve your skin's natural brightness and water levels. This luxurious meso has many uses including filling wrinkles and the back of hands, inside of legs and arms, as well as the abdomen and neck area. Luxurious rejuvenating cocktails for skin revitalisation treatments. They owe their unique properties to a unique composition, rich in ingredients that stimulates multi-level skin regeneration in the long term. The therapy restores the correct water balance, tension, and elasticity of the skin and slows down the processes of tissue ageing.

There are 13 vitamins inside INFINI Premium Meso N & Meso NHA that contribute to skin cell stimulation. Alongside this, there are also 23 different amino acids that help produce elastin and collagen, two significant proteins making up the skin layers. To combat free radicals, there are also anti-oxidants to ensure your skin remains healthy and glowing.

INFINI Premium Meso N & Meso NHA is a polyrevitalising solution that provides the dermis with the essential ingredients it needs to thrive. It creates the optimal environment to reboot fibroblasts activity which are responsible for the production of collagen, elastin and hyaluronic acid. INFINI Premium Meso N & Meso NHA stimulates the skin without changing the facial features or expressions. Containing free Hyaluronic Acid, INFINI Premium Meso N & Meso NHA smoothes out fine lines, restores radiance, deeply nourishes the skin, and increases the density of the dermis.

Vitamins: Sodium Ascorbate, Biotin, Panthenol, Folic Acid, Inositol, Nicotinamide, Pyridoxine, Riboflavin, Thiamine, Tocopherol, Retinyl Palmitate, Vitamin B12, Methylcobalamin

Amino acids: Alanine, α -Aminobutyric Acid, Asparagine, Aspartic Acid, Arginine, N-Acetyl Cysteine, Glutamine, Glycine, Histidine, Isoleucine, Leucine, Lysine, Methionine, Ornithine, Phenylalanine, Proline, Serine, Taurine, Threonine, Tryptophan, Tyrosine, Valine, Hydroxyproline

Minerals: Potassium Chloride, Magnesium Sulfate, Sodium Acetate, Sodium Chloride, Calcium Chloride

Coenzymes: NAD Nicotinamide, UTP Uridine Triphosphate, TPP Cocarboxylase

Other: Polysorbate 20, Glucosamine acetyl, N-Acetyl Cysteine

TREATMENT INDICATIONS:

- Skin revitalisation
- Anti-wrinkle and anti-aging prevention
- Strong skin hydration
- Improvement of skin quality
- Elimination of skin imperfections
- Improvement of skin color
- Strong skin nutrition and moisturisation
- Elimination of signs of aging

PREMIUM MESO **W** WhiteningMAX

Innovative formula designed for skin depigmentation and whitening.

5x10ml

A depigmenting concentrate designed for intensive treatments to reduce discolouration. Thanks to arbutin, tranexamic acid, kojic acid and glutathione, the formula visibly whitens and evens out skin tone. The addition of hyaluronic acid, antioxidants and liquorice root extract moisturises and smoothes the skin and gives it a bright, radiant look.

INFINI PREMIUM MESO WHITENING IS RECOMMENDED:

- Skin depigmentation and whitening
- Discoloration and post-inflammatory
- Anti-ageing prevention
- Healthy glow restoration

HYALURONIC ACID: 30mg/10ml

WHITENING COMPLEX: Tranexamic Acid, Kojic Acid, Glutathione, Arbutin

PEPTIDE COMPLEX: Oligopeptide-34

PLANT EXTRACT: Glycyrrhiza Glabra Root Extract

VITAMINS: Panthenol

STERILE DEVICE

PREMIUM MESO

H+ HAIR

The most effective concentrated peptide therapy developed for hair restoration and baldness reduction.

2x1ml

The innovative composition of the product is based on a combination of 3 peptides that prolong the anagen phase and improve the quality and life cycle of the hair. The formula is enriched with dextran, which temporarily stimulates circulation and increases plasma volumetricity, thus promoting active follicle regeneration and spread of the product within the scalp.

The performance of the formula is optimized by its high molecular weight hyaluronic acid content and sustained release mechanism.

Meso H+ is a wide-range hair growth stimulator, and the most effective solution for excessive hair loss and weak / brittle hair.

HYALURONIC ACID HMW:	15mg/1ml
SH-OLIGOPEPTIDE-4:	20mg/1ml
OCTAPEPTIDE-2:	15mg/1ml
ACETYL TETRAPEPTIDE-3:	12mg/1ml
TRIFOLIUM PRATENSE (CLOVER) FLOWER EXTRACT:	5mg/1ml
PLASMA LIKE FACTOR:	Dextran 5mg/1ml

PREMIUM MESO **H** HairMAX

Meso cocktail designed for hair conditioning and hair loss minimising.

5x10ml

HYALURONIC ACID:	30mg/10ml
PEPTIDE COMPLEX 10mg:	Acetyl Tetrapeptide-3, Octapeptide-2, sh-Oligopeptide-4
VITAMINS:	Panthenol, Biotin, Riboflavin, Thiamine HCL, Pyridoxine HCL, Cyanocobalamin
MINERALS:	Zinc Gluconate
AMINOXIDES:	Acetyl Cysteine, Glutamine, Arginine, Taurine, Tryptophan
PLANT EXTRACTS:	Trifolium Pratense (Clover) Flower Extract
PLASMA-LIKE FACTOR:	Dextran
RESTORATIVE FACTOR:	Hydrolyzed Keratin

The INFINI Premium Meso HairMAX complex prevents excessive hair loss, inhibits the process of hair thinning and stimulates their growth by extending the anagen phase. The content of biomimetic peptides guarantees high efficiency and a therapy aimed at all problems occurring within the scalp. Its action is based on a mixture of biomimetic peptides, growth factors, vitamins, minerals, and amino acids.

TREATMENT INDICATIONS:

- Revitalisation of hair and scalp
- Reduction of excessive hair loss and baldness (alopecia)
- Stimulation of hair growth
- Improving blood circulation
- Improving vitality, quality and condition of hair

PREMIUM MESO

C+ COLLAGEN

Concentrated tissue stimulator with outstanding regenerative and corrective effects, dedicated to eliminating skin defects and progressive signs of aging

2x1ml

HYALURONIC ACID HMW: 20mg/1ml

HYDROLYZED COLLAGEN: 20mg/1ml

Meso C+ is a synergy of the most powerful anti-age ingredients, being available in their highest concentration.

By containing collagen, the formula activates the auto regenerative cascade and has a dual effect: it promotes the pro-collagen proliferation and migration of fibroblasts, as well as activates the secondary reconstruction of the existing collagen.

The product's effect is compounded also by high molecular weight hyaluronic acid, which replenishes natural deficits and provides an optimized environment for maintaining physiological functionality and high tissue regenerative abilities.

Meso C+ is an excellent solution for correcting signs of aging (wrinkles, loss of elasticity), as well as skin imperfections (scars, uneven skin tone).

STERILE DEVICE

PREMIUM MESO

C CollagenStimulate

Revitalising complex with collagen
and hyaluronic acid

5x10ml

HYALURONIC ACID: 50mg/10ml

COLLAGEN: 50mg/10ml

PEPTIDE COMPLEX: Acetyl Tetrapeptide-2,
Acetyl Decapeptide-3

An advanced treatment cocktail for improving skin elasticity and firmness. A rich composition of ingredients based on the action of hydrolyzed collagen, hyaluronic acid and a peptide complex reconstructs supportive proteins and is an excellent solution for anti-aging prevention and rapid improvement of skin condition. C CollagenStimulate stimulates cell metabolism and fibroblast activity with positive effects on tissue thickening and tone. Intensively restructures connective tissue, restores skin firmness in the long term and prevents loss of elasticity in the aging process.

TREATMENT INDICATIONS:

- Skin revitalisation and rejuvenation
- Anti-wrinkle and anti-ageing prevention
- Improvement of skin quality and hydration

PREMIUM MESO

A AmberStimulate

Tissue stimulator with hyaluronic acid
and succinic acid

5x10ml

HYALURONIC ACID: 50mg/10ml

SUCCINIC ACID: 100mg/10ml

AMINO ACIDS: Serine, Proline, Glycine

A new generation tissue stimulator with a powerful redermalizing effect. Its exceptional reconstructive properties are created by the synergy of uncrosslinked hyaluronic acid, succinic acid and unique amino acid complex. The advanced composition stimulates the skin at multiple levels, accelerates collagen reconstruction, and provides an excellent solution for combating skin oxidation. Amber Stimulate is one of the most advanced anti-age formulas which already in a short time restore proper density, ten-sion and radiance to the skin.

TREATMENT INDICATIONS:

- Skin redetermination and reconstruction
- Lifting and smoothing of wrinkles
- Improvement of oxygenation and hydration of the skin
- Stimulation of collagen and elastin
- Antioxidant protection

PREMIUM MESO

A+ AMBER

Concentrated and most powerful stimulant in skin redermalization and anti-aging prevention.

2x1ml

HYALURONIC ACID HMW: 15mg/1ml

SUCCINIC ACID: 20mg/1ml

Amber + is a concentrated and most powerful stimulant in skin redermalization and anti-aging prevention.

Redermalization is the most effective method of stimulating the skin, involving its full restoration and reconstruction.

Thanks to the use of a synergistic combination of hyaluronic acid and succinic acid, the effect is achieved with a Three-dimensional anti-aging effect by increasing tissue hydration, stimulation of collagen and integral skin proteins, as well as antioxidant protection of cells.

The effect is enhanced by the use of the highest concentrations of succinic acid and high molecular weight hyaluronic acid. Amber+ is a combination of action on all causes of skin aging, which ensures the fastest rejuvenation effects.

PREMIUM MESO **BTX**

Soft lifting complex with hyaluronic acid and argireline.

5x10ml

An advanced cocktail to combat facial wrinkles and signs of skin ageing. A perfectly balanced combination of hyaluronic acid and argireline prevents the formation of new expressive wrinkles and reduces and stops the deepening of existing wrinkles, giving a spectacular smoothing effect. BTX is an effective stimulator of collagen and elastin synthesis and a stimulator of tissue restructuring. Its main action is muscle hydration of the skin, thanks to which the face regains its youthful contours and appears visibly smoother.

Argireline is a hexapeptide that acts as an inhibitor of acetylcholine, which blocks the impulse in the neuromuscular junction. Its "botox-like" effect relies on relaxing the tension of the facial skin's mimic muscles, which prevents the formation of new expression lines and reduces the depth of the existing ones. Due to the excellent rejuvenating properties of argireline, it is often used as a synthetic and non-toxic alternative to botulinum toxin treatments with clinically proven effectiveness. Recommended mainly for a strong lifting of the temple, forehead, and mouth area.

TREATMENT INDICATIONS:

Soft lifting of the skin

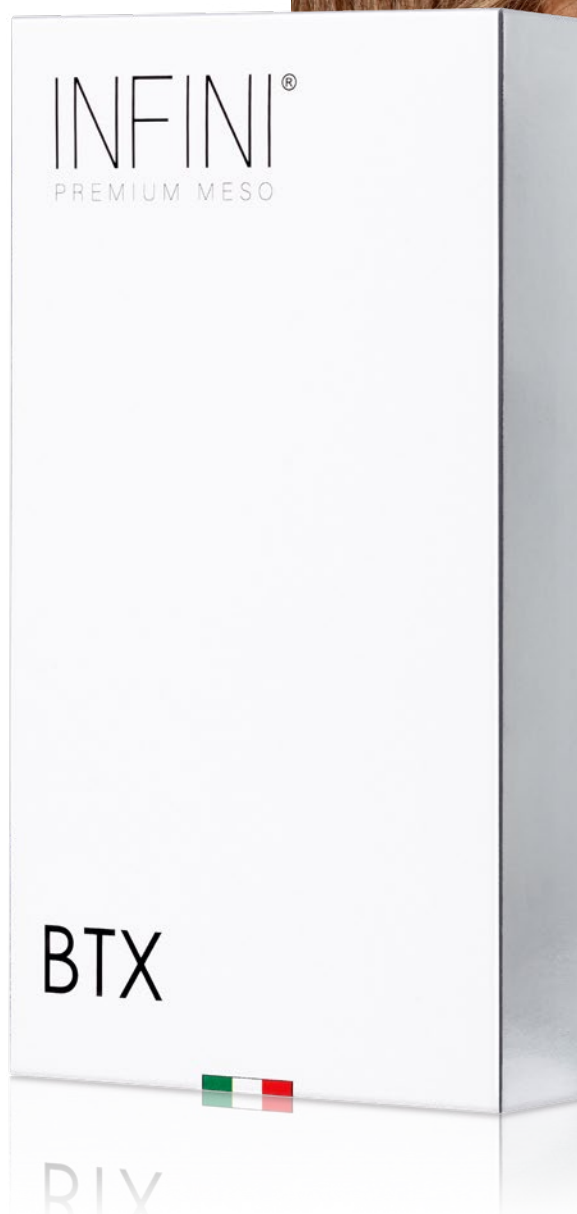

Anti-wrinkle and anti-ageing prevention

Strong hydration of the skin

Sustaining the effects of botulinum toxin treatments

HYALURONIC ACID: 50mg/10ml

PEPTIDE COMPLEX: Acetyl Hexapeptide-8

PREMIUM MESO **DNA**

Therapeutic complex based on hyaluronic acid and sections of low-molecular DNA and RNA

1x10ml

INFINI PREMIUM MESO - DNA SUPERBOOSTER is a therapeutic complex based on hyaluronic acid and sections of low-molecular DNA and RNA, with an outstanding rejuvenation effect. With nucleotides in the form of nucleic acids, the product prepares tissues for immediate renewal and redermalization. DNA Superbooster forces the physiological reconstruction of collagen and elastin, with a positive effect on the density and cohesiveness of the skin, and protects the DNA of cells from the destructive effects of oxidative stress.

The product's effect is also due to the unique ability of nucleotides to bind water, as well as the presence of hyaluronic acid further optimizing the effect of tissue hydration.

The high concentration of stimulating substances that increase skin density and fill skin defects has been enriched with Glutathion, which enhances the effects of the therapy.

COMPOSITION:

Hyaluronic acid
Glutathion
Carnosine
Hydrloyzed RNA
Hydrolyzed DNA

TREATMENT INDICATIONS:

INFINI PREMIUM MESO - DNA Superbooster is designed to revitalize the skin and eliminate the consequences of skin aging such as flabbiness, dehydration, wrinkles, uneven skin tone.

PREMIUM MESO **LipoMAX**

An innovative formula designed for aesthetic treatments to combat fatty tissue.

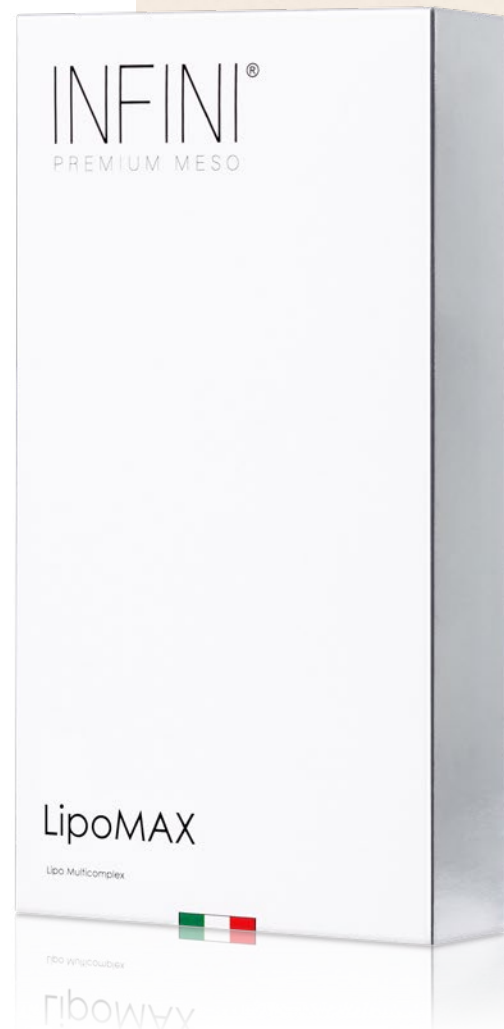

5x10ml

INFINI Premium LipoMax is an innovative formula designed for aesthetic treatments to combat fatty tissue. LipoMax causes permanent dissolution of fat accumulations (lipolysis) and is currently one of the most effective and safest alternative to surgical liposuction procedures. Lipolysis is simply non-invasive body contouring, involving the injection of active substances that cause the dissolution of fat cells. An intentional and controlled mild inflammation of the fat tissue is created at the injection site. "Swollen" cells rupture and the fat released from them passes into the blood, with which it goes to the liver, where it is broken down and then excreted from the body. As a result, the excess accumulated tissue disappears and the circumference of the treatment area visibly decreases.

The effects of LipoMAX treatment appear gradually over the first few weeks. Their durability depends mainly on the lifestyle and diet used. For permanent and optimal results, 3-5 treatments should be performed at intervals of 21-28 days.

TREATMENT INDICATIONS:

- levelling of adipose tissue
- acceleration of fat cell metabolism
- reduction of body circumferences
- silhouette modelling
- improvement of body contours and firmness

PREMIUM MESO E EYEBOOSTER

Hyaluronic Acid & Amino Acid concentrated stimulator complex

2x1ml

HYALURONIC ACID HMW:	2mg/1ml
AMINO ACIDS COMPLEX:	Proline, Serine, Glycine 3mg/1ml
GLUTATHIONE:	1mg/1ml
NIACINAMIDE:	1mg/1ml

The specific nature of the eye area requires exceptional care. The skin around the eyes is the thinnest and the ageing is the fastest, which causes the most of the treatment problems. You can bring back youthful look to it by mesotherapy made with a top quality hyaluronic acid-based product. Such a product is Infini Premium Meso Eyebooster.

What distinguishes Infini Premium Meso Eyebooster

It is a sterile hyaluronic acid-based booster manufactured to a pharmaceutical standard. The innovative composition of Infini Premium Meso Eyebooster is based on a unique sequence of amino acids, supported by powerful antioxidants: niacinamide and glutathione. It will be perfect for patients with tissue atrophy and the presence of numerous wrinkles. The product will also bring results in cases of dark circles under the eyes and sagging eyelid skin.

Most valuable active ingredients of Infini Premium Meso Eyebooster

Hyaluronic Acid (2 mg/ml) has a strong smoothing effect, eliminates fine facial wrinkles around the eyes and also prevents the deepening of the tear valley. Its application supplements the deficiencies of natural hyaluronic acid that appear with age, and has a positive effect on the density and elasticity of the tissue. In addition, thanks to its hygroscopic abilities, it increases hydration and stimulates restorative functions. The concentration of hyaluronic acid was developed in an optimal way for the eye area to guarantee great results with full treatment safety.

Amino acid complex (Proline, Serine, Glycine), the building proteins of human collagen. The amino acid sequence stimulates the production and reconstruction of the skin's support fibers, causing strong restructuring and thickening of the tissue. These ingredients are crucial for eyelid flaccidity and the result of parchment skin. Amino acids are also one of the components that make up NMF (Natural Moisturizing Factor), a natural moisturizing factor, so they stop excessive water loss from the epidermis, accelerate the regeneration of the skin of this area of the face and prevent cellular ageing from accelerating.

Niacinamide - a subsidiary of vitamin B3 involved in the synthesis of amino acids, ceramides and other building constituents of the skin. It seals the skin's hydro-lipid barrier, preventing dryness, which is one of the biggest skin problems in the eye area. Niacinamide inhibits the deposition of pigment in the epidermis prevents unsightly dark circles and the tired-eye effect. It exhibits strong antioxidant activity and protects the delicate eyelid skin from the degrading effects of external exposure.

Glutathione - is a tripeptide that occurs in the cells of the body naturally. Due to its chemical structure, glutathione has strong antioxidant properties and protects the skin in the eye area from the effects of oxidative stress caused by exogenous factors.

The comprehensive composition of Infini Premium Meso Eyebooster allows for excellent therapeutic effects on wrinkles, atrophy and other signs of aging of the skin in the eye area. The product will also help in the fight against bruising and deepening tear valley.

PREMIUM PEEL **IntimatePeelPRO**

Revitalising and whitening peeling for intimate places, such as genital or anal as well as sensitive areas such as inner thighs, underarms
Acid Multicomplex + plant extracts

5x5ml

Intimate Peel PRO uses lactic acid and kojic acid to remove the top layer of skin (epidermis).

The effects underneath the removed epidermis are noticeably smoother and brighter skin. Lactic acid is used to treat hyperpigmentation, age spots, and other factors that contribute to a dull and uneven complexion.

Other benefits of AHAs like lactic acid include improved skin tone and reduced pore appearance. However,

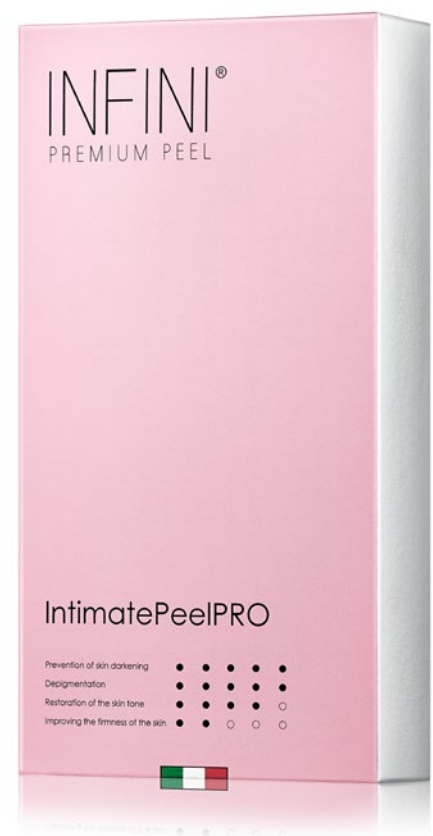

AHAs such as glycolic acid, lactic acid is a bit milder. This makes a lactic acid peel a better choice for sensitive skin. Kojic acid [alpha-hydroxyacid] has a high whitening and depigmenting action, it is an excellent inhibitor of melanogenesis and it's used in melasma, chloasma, senile lentigo, solar lentigo and dark circles treatment.

TREATMENT INDICATIONS:

- revitalization and rejuvenation of the intimate area
- depigmentation of dark coloring of sensitive areas (external intimate areas , armpits, groin, inner side of thighs, nipples).
- restoration of proper skin tone
- eliminating skin discoloration after wax and laser hair removal treatments

AREAS OF APPLICATION:

- intimate areas
- buttock crevice
- groins
- armpits
- inner side of the thighs
- nipples
- discoloration after hair removal

PREMIUM MESO **Remedium Ha+**

Remedium Ha+ is a freeze-dried hyaluronidase powder for reducing unwanted cosmetic, removing hyaluronic acid effects and the treatment of hypertrophic scars, as well as skin fibrosis after liposuction.

5x10ml

INFINI Premium Remedium Ha+ is a freeze-dried hyaluronidase powder which is an effective solution for the depolymerisation and hydrolysis of chemical bonds in cross-linked hyaluronic acids.

Hyaluronidase enzymes effectively degrade and dissolve hyaluronic acid, favouring its diffusion and reabsorption. They can also improve the appearance of hypertrophic scars, as well as skin fibrosis after liposuction. This active ingredient prevents the hyperpolymerisation of glycosaminoglycans responsible for water retention, acting directly to remove the retained liquid and reduce the adipocytes volume. Hyaluronidase is particularly suitable for treatment cellulite because it is an active ingredient that attacks the fibrosis associated to this problem.

Ingredients: Aqua, Succinic Acid, Sodium Hyaluronate, Serine, Proline, Glycine, Phenoxyethanol, Benzyl Alcohol, Sodium Hydroxide.

TREATMENT INDICATIONS:

Skin redetermination and reconstruction

Lifting and smoothing of wrinkles

Improvement of oxygenation and hydration of the skin

Stimulation of collagen and elastin

Antioxidant protection

EYE ABOSOLUTE EYE BAG SERUM

30 ml / 1.01 fl. oz.

EYE BAG is a creamy serum designed for care of the sensitive skin of the eye area, which eliminates swelling and symptoms of eyelid skin aging. Its unique composition rich in emollients, oils and plant extracts brings all-day comfort, velvety smoothness and a feeling of hydration. EYE BAG has a triple action: draining, smoothing and moisturizing. The product improves the eye contour for a long time, increases the level of hydration and minimizes swelling, guaranteeing a rejuvenated look.

INDICATIONS FOR USE

- swelling and bruising of the eyelids
- wrinkles and lack of tension
- dryness and dehydration of the skin
- symptoms of tired eyes

EYE ABOSOLUTE ANTI AGE SERUM

30 ml / 1.01 fl. oz.

ANTI AGE EYE ABOSOLUTE is a creamy serum for skin care and rejuvenation. The eye circles are instantly lifted and smoothed. The cream surrounds the skin with a velvety texture, providing all-day comfort, a fresh look and a feeling of hydration. The product's unique composition rich in emollients, hyaluronic acid, collagen, colloidal gold, plant oils and extracts has a three-dimensional effect: gives a gentle lifting effect, smoothing facial wrinkles and eliminating imperfections of the eyelid skin. The product slows down the aging process, improves eye contour and smoothes the skin, guaranteeing a rejuvenated look.

INDICATIONS FOR USE

- anti-aging prophylaxis of the eye area
- flabby skin with signs of aging
- mimic wrinkles
- dryness and dehydration of the skin
- loss of firmness and elasticity eyelid skin
- skin imperfections and dark circles around the eyes

EYE ABOSOLUTE DARK CIRCLE SERUM

30 ml / 1.01 fl. oz.

DARK CIRCLE EYE ABOSOLUTE is a creamy serum for the care and rejuvenation of the skin around the eyes, which brightens the skin of the eyelids immediately and gives a youthful look. Thanks to light-reflecting ingredients and improved microcirculation, the cream visibly reduces dark circles and coloring of the eyelids. The velvety consistency gives all-day comfort and a feeling of hydration, and its sensual scent relaxes. The unique composition rich in emollients, oils and plant extracts has a three-dimensional action: provides strong hydration, delays the aging process and eliminates dark circles on the eyelids. It improves eye contour and smoothens the skin, guarantee a visibly rejuvenated look.

INDICATIONS FOR USE

- anti-aging prophylaxis of the eye area
- skin imperfections and dark circles around the eyes
- mimic wrinkles
- dryness and dehydration of the skin

ANTIOXIDANT ABSOLUTE SLOW AGE SOLUTION CREAM

50 ml / 1.69 fl. oz.

ANTIOXIDANT ABSOLUTE SLOW AGE SOLUTION CREAM is a velvety concentrated cream against exogenic aging caused by the negative influence of environmental factors. The cream is a vitamin and antioxidant bomb for all skin types, especially for gray and shabby skin, tired excessive sunlight and environmental pollution. The cream's formula is enriched with rejuvenating hyaluronic acid, niacinamide and stimulating peptides, thanks to which ANTIOXIDANT ABOSOLUTE works comprehensively on all causes of skin cell aging. The product gives the skin a glow and brings all-day comfort, and its delicate fragrance relaxes. The unique composition of the product, rich in antioxidants, emollients, vegetable oils and extracts effectively counteracts skin dryness, lightens discoloration, increases elasticity, adds radiance and vitality.

HYAL FORTE

HYDRATION ABSOLUTE AGE FIGHT CREAM

50 ml / 1.69 fl. oz.

HYAL FORTE is a deeply moisturizing cream with a light, silky texture and excellent rejuvenating effects. Dedicated to mature skins and skins prone to the formation of wrinkles as a result of dehydration. The cream actively binds water in the skin, restoring its proper balance and hydrodynamics of the skin. It strongly revitalizes and smoothes the skin, as well as stimulates its intensive regeneration. It improves the elasticity and resilience of the skin and prevents the premature appearance of wrinkles.

INDICATIONS FOR USE:

- premature aging of the skin
- wrinkles and loss of elasticity
- dryness and dehydration of the skin
- photoaging and exogenous aging
- continuation of skin care after aesthetic medicine treatments

RETINOL FORTE 1%

REBUILDING SOLUTION CREAM

50 ml / 1.69 fl. oz.

RETINOL FORTE is a unique anti-ageing cream with an effect on skin imperfections. Dedicated to the night care of mature skin that requires deep revitalization. It has a strong rejuvenating effect and stimulates skin to biological renewal. Thanks to cell stimulation thickens skin and reduces the visibility of pores and wrinkles. Synergistic combination of retinol with moisturizers and soothing ingredients reduces irritation and helps build skin's tolerance to retinol. The lightweight texture does not block the skin and leaves a satiny, comfortable finish.

INDICATIONS FOR USE:

- advanced skin aging
- skin imperfections
- discoloration and irregular skin tone
- acne skin
- photoageing and exogenous aging
- continuation of skin care after aesthetic medicine treatments

NHA - DAY **ANTI AGE ABSOLUTE CREAM**

50 ml / 1.69 fl. oz.

NHA is a modern anti-aging cream inspired by aesthetic medicine treatments. Dedicated to day care for mature skins with the problem of facial and static wrinkles. High concentration of substances increasing skin density provides an excellent rejuvenating effect. The cream encourages cell stimulation and deep renewal of the skin, which restores lost volume and regenerative capacity. The rich texture smooths the skin and leaves a comfortable glowing effect for the entire day.

INDICATIONS FOR USE:

- advanced skin aging
- wrinkles and loss of elasticity
- skin sagging and loss of contouring
- photoaging and exogenous aging
- continuation of skin care after aesthetic medicine treatments

NHA - NIGHT **ANTI AGE ABSOLUTE CREAM**

50 ml / 1.69 fl. oz.

NHA is a modern anti-aging cream with cell-delaying technology that reverses the biological age of the skin, inspired by aesthetic medicine treatments. Dedicated to the night care of mature skins with the problem of facial and static wrinkles. High concentration of substances that increase skin density and filling its defects provides excellent rejuvenation and visible metamorphosis of the skin. The cream provides deep stimulation for tightened and smoothed skin. The satin texture melts into the skin, providing it with a richness of active nourishing ingredients.

INDICATIONS FOR USE:

- advanced skin aging
- wrinkles and loss of elasticity
- skin sagging and loss of oval shape
- photoaging and exogenous aging
- continuation of skin care after aesthetic medicine treatments

REGENERATION ABSOLUTE

POST AESTHETIC TREATMENT CREAM

50 ml / 1.69 fl. oz.

REGENERATION ABSOLUTE is a new regeneration complex technology with plant stem cells, beta-glucan and hydrodynamic complex. It is designed for irritated skin, dehydrated and damaged by aesthetic treatments. It has comprehensive nourishing and protective effect and accelerates regeneration of the epidermis. Moisturizing complex enriched with shea butter, collagen and hyaluronic acid rebuilds the lipid barrier of the epidermis, prevents post-treatment dryness and reduces the feeling of discomfort and skin tightening.

REGENERATION ABSOLUTE Accelerates regeneration and eliminates redness, hypersensitivity and skin irritation after treatments: needle and micro-needle mesotherapy, chemical peels, laser therapy, fillers, other invasive treatments and irritations.

INDICATIONS FOR USE

- skin regeneration after aesthetic medicine treatments
- skin burns
- post-treatment skin dryness
- excessive keratosis and peeling of the skin
- itching and burning of the skin

PROTECTION ABSOLUTE SPF 50

POST AESTHETIC TREATMENT CREAM

50 ml / 1.69 fl. oz.

PROTECTION ABSOLUTE is specialized photoprotection cream with high SPF. Synergistic application of photostable UVA and UVB filters ensures effectiveness and very high sun protection on many levels. Enriched with powerful antioxidants, it protects against accelerated ageing and the negative effects of infrared radiation. An advanced multi-spectrum filter system, combined with soothing plant extracts, vitamins and antioxidants, comprehensively ensures skin safety. PROTECT ABSOLUTE is dedicated for year-round photoprotection, as well after aesthetic medicine treatments. Gentle and weightless texture is also perfect under makeup. Year-round cream, for all skin types.

INDICATIONS FOR USE

- prophylaxis against photo-aging
- skin protection after aesthetic medicine treatments

mesopenONE 2.0™

Specialised device cordless device designed for micro-needle and fractional mesotherapy treatments

mesopenONE™ is an innovative device for professional micro-needling and fractional skin mesotherapy treatments. mesopenONE™ is one of the most advanced devices Automated Meso Micro- Needling and DermaStamp causing rejuvenation of the skin and eliminating its imperfections. mesopenONE™ effectively reduces wrinkles, minimizes pores, post-surgery and acne scars. In addition, the use of mesopenONE™ results in strong thickening of the skin , improvement of its structure, increasing its tension and cohesiveness.

How does mesopenONE™ work

Perforation of the skin provokes the formation of controlled skin damage, which activates repairing processes stimulating the synthesis of connective tissue support fibers (dermis). As a result of micro punctures inflammation and vascular angiogenesis are initiated, thanks to which the skin visibly smoothest and its metabolism and oxygenation increases. The formation of skin microchannels also facilitates the absorption and transport of active substances applied externally to the skin. Thanks to its multidimensional action, mesopenONE™ causes thickening of the skin and enables its strong conditioning.

ADJUSTMENT OF SPEED AND DEPTH OF PUNCTURES

Disposable treatment cartridges are a guarantee of safety and effectiveness of the treatment. Each of the cartridges has smooth regulation of needle advancement in the range of 0,25 - 2,5mm. Adjustable needle length during treatment allows for safe and comfortable procedure on every area of face and body. High frequency of punctures (up to 28.000 punctures) adjustable on 6 levels allowing to reduce treatment time and adjusting treatment intensity to individual skin needs.

WIRELESS DEVICE

mesopenONE™ device has a wireless high-powered motor, enabling a comfortable work for up to 2 hours after being fully charged.

mesopenONE™ ADVANTAGES

- High frequency of up to 28,000 punctures/minute
- High-power wireless device
- Different types of sterile treatment cartridges
- Unique treatment cartridges with low needle gauge
- Ability to safely use multiple techniques
- Innovative, efficient and maintenance-free

INFINI[®]

PREMIUM FILLER

Safety is the key to us. That is why we have developed an application that allows you to check the authenticity from anywhere in the world of INFINI PREMIUM FILLER products.

All you have to do is to scan the barcode on the product's blister with your smartphone. The system will allow you to identify the originality of the product, LOT number and expiry date. Thanks to it you can always be sure that you are using legal INFINI PREMIUM FILLER products and your treatment will be safe and effective.

To use the identification system, download the application INFINI LAB from GooglePlay, AppStore.
