# mesopenONE™

**mesopenONE™** is an innovative device for professional micro-needling and fractional skin mesotherapy treatments.

mesopenONE™ is one of the most advanced devices Automated Meso Micro- Needling and DermaStamp causing rejuvenation of the skin and eliminating its imperfections. mesopenONETM effectively reduces wrinkles, minimizes pores, post-surgery and acne scars. In addition, the use of mesopenONETM results in strong thickening of the skin , improvement of its structure, increasing its tension and cohesiveness.

## **How does mesopenONE™ work**

Perforation of the skin provokes the formation of controlled skin damage, which activates repairing processes stimulating the synthesis of connective tissue support fibers (dermis). As a result of micro punctures inflammation and vascular angiogenesis are initiated, thanks to which the skin visibly smoothest and its metabolism and oxygenation increases. The formation of skin microchannels also facilitates the absorption and transport of active substances applied externally to the skin. Thanks to its multidimensional action, mesopenONE™ causes thickening of the skin and enables its strong conditioning.

## **Wireless device**

mesopenONE™ device has a wireless high-powered motor, enabling a comfortable work for up to 2 hours after being fully charged.

## **mesopenONE™ ADVANTAGES**

- High frequency of up to 22,000 punctures/minute
- High-power wireless device
- Different types of sterile treatment cartridges
- Unique treatment cartridges with low needle gauge
- Ability to safely use multiple techniques
- Innovative, efficient and maintenance-free
