BIOAGEPEEL™

MEDICAL BIOPEELING FOR INTENSIVE
SKIN RENEWAL AND REJUVENATION

BioAgePeel™ P

BioAgePeel P Biorevitalizing
year-round peeling

CE Medical device class II

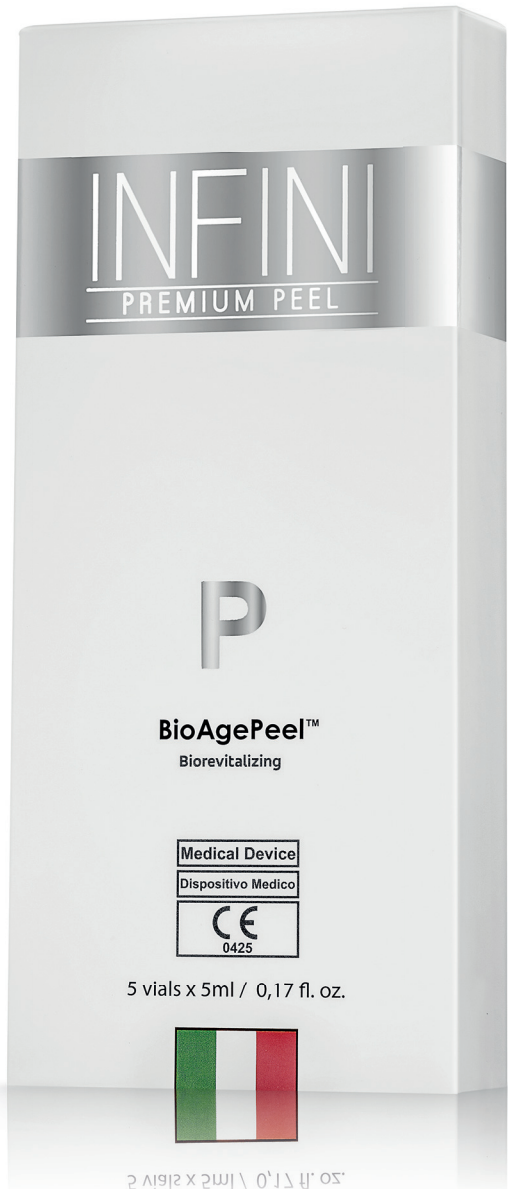

BioAgePeel™ is a new generation of acid stimulants for intensive skin renewal and rejuvenation. BioAgePeel™ works by selectively stimulating the deep layers of the skin without damaging the outer layers of the epidermis. The combination of the key ingredients within the product activates the Skin Stress Response System (SSRS) and triggers a series of auto-regenerative skin reactions. The preparation intensifies the renewal and thickening of the skin by stimulating collagen, elastin and hyaluronic acid, as a result of which the skin becomes visibly tight and rejuvenated.

A UNIQUE FORMULA OF ACID PEELING

BioAgePeel™ is an innovative form of chemical peel based on a combination of the most effective acids used in cosmetics and aesthetic medicine.

Stabilized trichloroacetic complex synergy, in combination with mandelic and kojic acid allows the acid components to be of the highest effectiveness, without the side effect of long-lasting irritation and peeling of the skin

ADVANTAGES OF THE TREATMENT

BioAgePeel™ is a professional treatment procedure with clinically proven effectiveness. The treatment is based on a multi-layer application of an innovative acid complex that selectively works on all skin layers.

Despite the use of a combination of highly concentrated chemical acids, the treatment does not exfoliate the skin and can be performed all year round. The BioAgePeel™ effects are visible after just one treatment, with results being maintained through a series of 4-6 treatments.

BioAgePeel™ does not require any prior preparation and its safety is confirmed by a medical certificate. After the treatment, it is recommended to use a dedicated home care treatment that intensifies and maintains the effects of the therapy - BioAgePeel™ Home Continue Cream

IMPROVING SKIN TENSION AND FIRMNESS

SKIN LIFT

REDUCING THE BIOLOGICAL AGE OF THE SKIN

SMOOTHING WRINKLES AND SKIN STRUCTURE

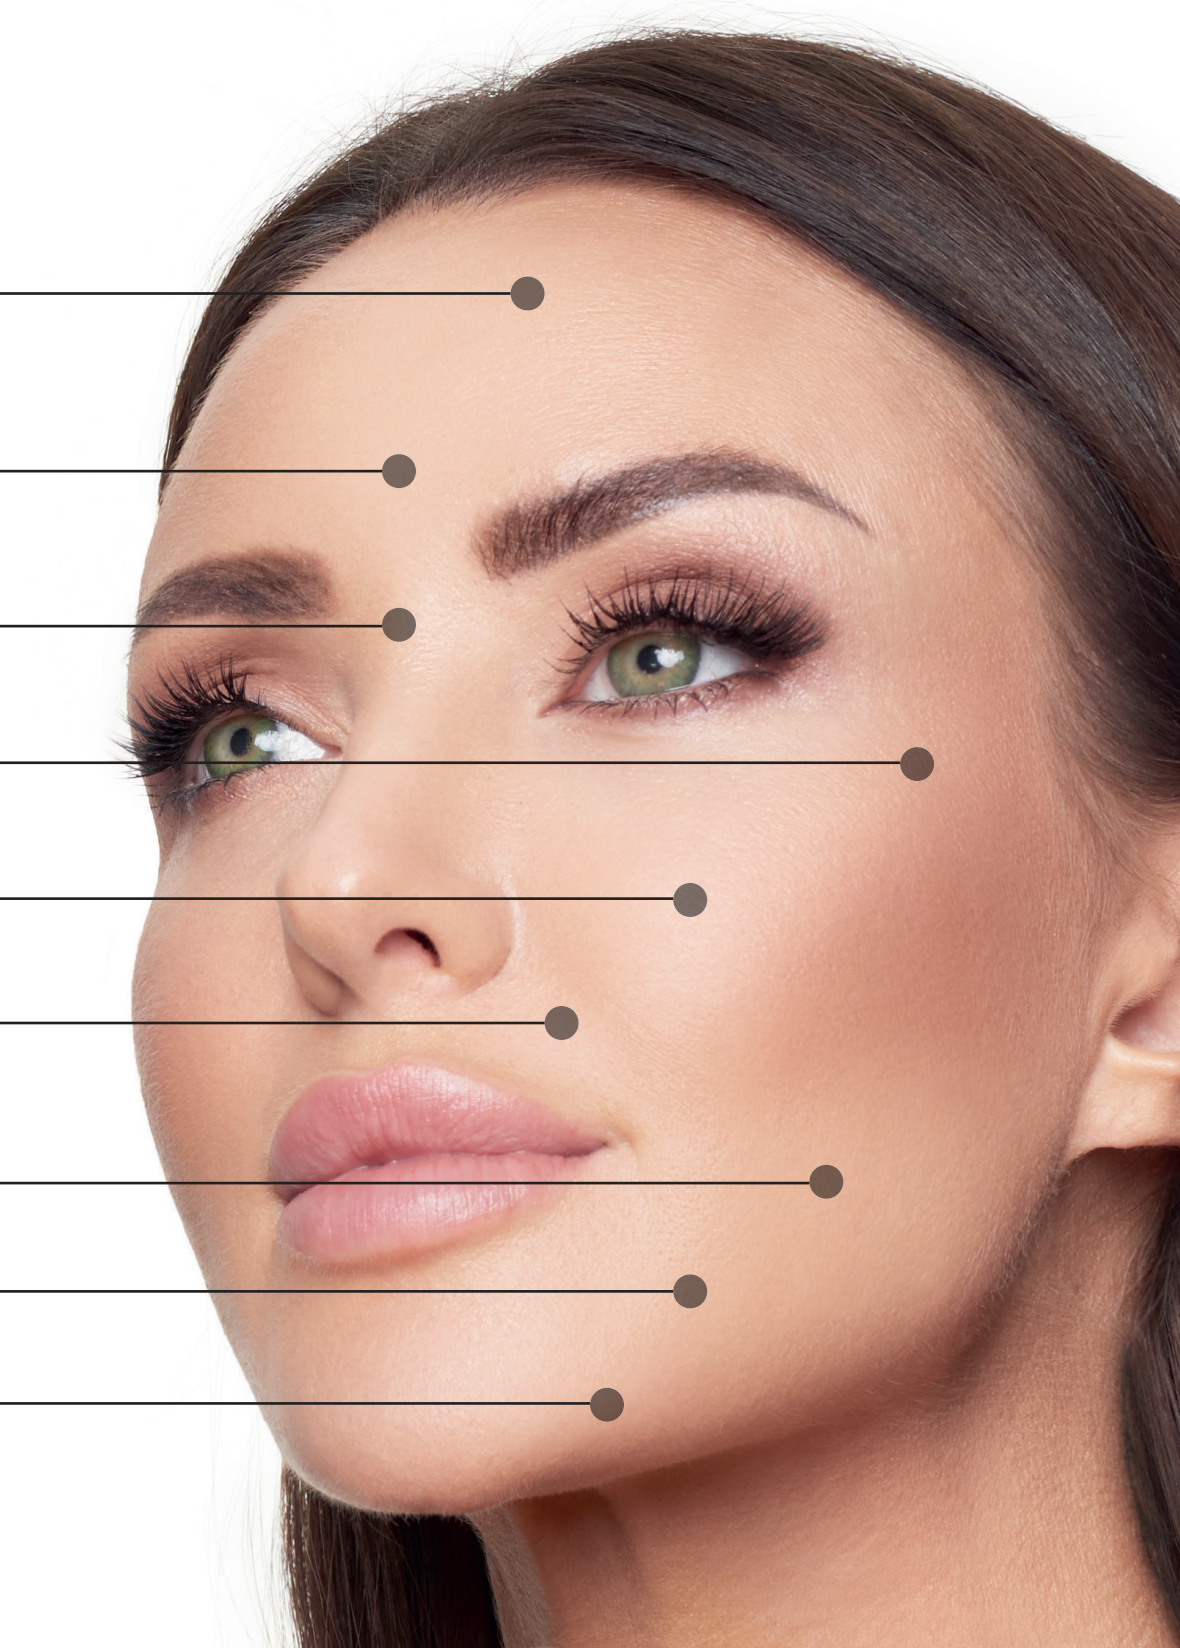

SKIN ACNE THERAPY AND ITS AFTER- EFFECTS

REMOVING DISCOLOURATIONS

ILLUMINATING AND REJUVENATING THE SKIN

BioAgePeel™ cream

POST-TREATMENT

- Cream with acidic & niacinamide multi-complex

BioAgePeel Home Continue Cream is a post-treatment cream recommended for home use, in order to continue and extend the therapy with BioAgePeel peeling. Due to the acidic complex, the cream optimizes the effects and increases the effectiveness of the treatment. A synergistic connection the combination of chemical acids with hyaluronic acid and strong antioxidant niacinamide eliminates skin imperfections and restores the skin with proper tension and glow. The cream is also dedicated to problematic skin, subject to photoaging or hyper-pigmentation
