Product:

The 8300 Series provides new dimensions of adjustability and versatility to the professional racer and the high-end aftermarket customer. The compression adjuster features an adjustable parabolic needle bleed bypass and a conventional shim stack and piston carried over from the 8760. This results in 20 clicks of adjustment with enhanced linear steps between settings.

Adjustable Packages:

The 8300 Series damper sets the standard in entry-level, double-adjustable shock absorbers in terms of performance, quality, and value.

PS-8300RM

- Remote Reservoir

PS-8300PB

- Piggyback Reservoir

Package Details:

Features:

- Modular
- Coarse Acme Thread Body

Benefits:

- Allows the use of piggybacks where remote versions are not desirable or feasible
- Greater ease of spring preload adjustment
- Added durability in harsh environments
- Configuration with a standard hose or an optional banjo fitting hose for added flexibility in installation

Get that Winning Edge

As the world leader in suspension technology, we have won numerous races and championships in F1, ALMS, Indy Car, GARRS, and NASCAR.

Our shocks are hand-built, tailored to your driving preferences or car setup, and dyno tested to ensure the highest attention is paid to detail, consistency, and performance.
