

PENSKE AIR SPRING

AS-AIR-SPRING SHOWN WITH CANISTER OPTION

Product:

The Air Spring is a self contained unit that replaces your conventional coil spring. You can literally come up with limitless spring rates, both digressive, and progressive, with one unit. Developed initially for Dirt Latemodels where dual and triple rate spring curves are the norm. This device eliminates un-needed inventory, and even eliminates bump stops.

Bump stops are normally run to generate a progressive rate at max travel, because of the volume, you get a natural progressive spring curve!

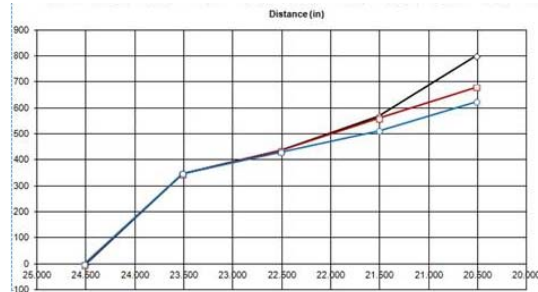

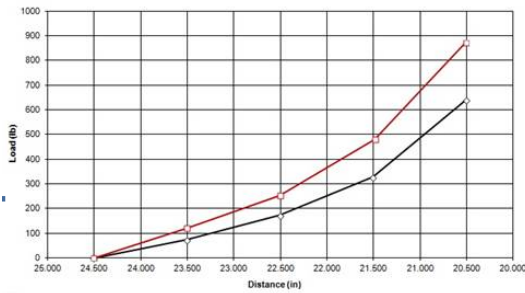

Package Details:

Features:

- Aluminum Body
- High-quality components and materials
"increased durability and consistency"
- Up To 7" of Travel
- Laser Etched Travel Indicator
- Can Generate Up To 5,000lbs of Load
