SAFETY DATA SHEET

SDS No.: 1.0
Revision: N/A
Date Created: February 26, 2020

1. CHEMICAL PRODUCT AND COMPANY IDENTIFICATION

Product Identifier: **RB Emulsion Remover**
General Use: **Printing**
Product Description: **Liquid**

Manufactured By:
Easiway Systems, Inc.
540 S River Street
Delano, MN 55328
Phone 1-763-972-6306
www.easiway.com
sales@easiway.com

Distributed By:
RB Digital
6325 Dixie Rd. Unit 7
Mississauga, ON L5T 2E5
Phone: 416.638.0638
https://rbdigital.ca/

EMERGENCY TELEPHONE NUMBER:
(800)-255-3924 ChemTel USA, Canada, Puerto Rico & U.S.Virgin Islands
+1(813) 248-0585 ChemTel International (Call Collect)
Easiway Systems Contract Number **MIS3609005**

2. HAZARD IDENTIFICATION

EMERGENCY OVERVIEW

GHS CLASSIFICATION OF SUBSTANCE

Flammable Liquid	Not Applicable
Aspiration Toxicity	Not Applicable
Skin Corrosion/Irritation	Category 1A - Corrosive
Eye Corrosion/Irritation	Category 1
Sensitization	Not Rated Under GHS
Carcinogenicity	Not Rated Under GHS
Specific Organ Toxicity Repeated Exposure	Not Rated Under GHS
Specific Organ Toxicity Single Exposure	Not Rated Under GHS
Reproductive Toxicity	Not Rated Under GHS
Acute Toxicity	Not Rated Under GHS
Germ Cell mutagenicity	Not Rated Under GHS
Corrosive to Metals	Not Rated Under GHS; G31 Corrosion test completed for more concentrated similar material.
Hazardous to the aquatic environment	Category 2 - Acute

Hazard Category - means the division of criteria within each hazard class, e.g. acute toxicity includes five hazard categories and flammable liquids include four hazard categories. These categories compare hazard severity within a hazard class. "GHS Classification of Substance" means the material hazard class under that particular category and should not be taken as a comparison of hazard categories more generally. Degree of severity under GHS is "1" being the most severe and sequential numbers indicating correspondingly less severity. "Not Classified Under GHS" does not have characteristics that fall into any of the categories for that hazard class.

GHS LABEL ELEMENTS

Hazard Pictograms:

thyroid eye & skin

Signal Word:
DANGER

Hazard Statements:
H314 - Causes severe skin burns and eye damage
H373 - May cause damage to thyroid through prolonged or repeated ingestion of iodine containing ingredients
H402 - Harmful to aquatic life

Precautionary Statements
General:
P101-If medical advice is needed, have product container or label at hand.
P102 - Keep out of reach of children.
P103-Read label before use.
Prevention:
P201 - Obtain special instructions before use.
P202 - Do not handle until all safety precautions have been read and understood.
P280 - Wear protective gloves. Wear eye or face protection.
P264 - Wash hands thoroughly after handling.
Response:
P305+P351+P338 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P337+P313 - If eye irritation persists: Get medical advice/attention.
P303+P361+P353 - IF ON SKIN (or hair): Remove/Tape off immediately all contaminated clothing. Rinse skin with water/shower.
P310 - Immediately call a doctor, a POISON CENTER.
P314 - Get medical advice/attention if you feel unwell.
P333+P313 - If skin irritation or rash occurs: get medical advice/attention.
P362+P364 - Take off contaminated clothing and wash it before reuse.
Storage/Disposal:
P403+235+404-Store in well-ventilated place. Keep cool. Store in closed container.
P501-Dispose of contents/container in accordance with local/regional/federal regulations.

Other hazards which do not result in classification for Hazards Not Otherwise Classified (HNOC) and Physical Hazards Not Otherwise Classified (PHNOC) **None Known**

3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/mixture: Mixture
Other means of identification: None
CAS number for mixture: Not Applicable
Product Code: Emulsion Remover

Component	wt%	CAS Registry #
Sodium Metaperiodate	1 - 5	7790-28-5
Periodic Acid	3 - 8	10450-60-9
Sodium Dodecyl Diphenyl Oxide Disulfonate	4 - 6	119345-04-9
Water	balance	

There are no additional ingredients present which, with the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Occupational exposure limits, if available, are listed in Section 8.

4. FIRST AID MEASURES

DESCRIPTION OF NECESSARY FIRST AID MEASURES

INHALATION:

Remove to fresh air and keep at rest in a comfortable position. Get medical attention if symptoms persist after moving to fresh air. Give oxygen if available, symptoms persist, and medical attention is not immediate.

EYE CONTACT:

Remove contact lens (if present). Rinse eyes immediately with plenty of clean water for at least 15 minutes.
If necessary, gently hold the eyelid open during the flush. Seek medical attention following initial eye washing.
If irritation persists after the 15 minute eye washing, seek medical attention.

SKIN CONTACT:

Immediately wash skin with mild soap solution to remove material from skin. Remove affected clothing and launder prior to re-use. If skin damage occurs other than redness, seek medical attention and provide this SDS to attending medical personnel.

INGESTION:

Not a likely route of exposure based on use. If accidental ingestion does occur, rinse mouth immediately with water. Seek immediate medical attention and provide SDS to attending medical personnel. DO NOT INDUCE VOMITING unless instructed to do so by trained medical personnel/Poison Control Center.

MOST IMPORTANT SYMPTOMS/EFFECTS, ACUTE AND DELAYED

Potential acute health/effects:

Eye Contact	Corrosive effects if left in the eye.
Inhalation	not appreciable vapor hazard; mist will be corrosive and irritating to respiratory tract.
Skin Contact	redness and irritation on prolonged contact.
Ingestion	Digestive disruption

Over-exposure signs/symptions

Eye Contact	corrosive damage to the eye.
Inhalation	Exposure to a mist may cause nose, throat, and lung corrosive effects.
Skin Contact	corrosive damage or skin irritation and dermatitis
Ingestion	Effects related to iodine exposure.

Indication of Immediate Medical Attention and Special Treatment Needed, If Necessary:

Notes to physician	Product is water based, acidic, and contains oxidizing agents with Iodine in its structure.
Specific treatments	No specific treatment
Protection of First-Aiders	No special precautions required

5. FIRE FIGHTING MEASURES

Flashpoint and Method:	>93^{o}C
Flammable Limits:	Not Determined
Autoignition Temperature:	Not Determined

GENERAL HAZARD:

Product is water based and not a significant fire hazard. Sodium metaperiodate and Periodic Acid are oxidizers and may contribute to a fire. The product has an acid pH and hot mist may be corrosive on contact.

SUITABLE EXTINGUISHING MEDIA:

Water fog or fine spray; dry chemical fire extinguishers; carbon dioxide fire extinguishers; foam; alcohol resistant foams

(ATC type). Use water fog or fine spray for cooling exposed containers to control heating.

UNSUITABLE EXTINGUISHING MEDIA:
Any extinguisher that is unsuitable for oxidizing agents.

SPECIFIC HAZARDS ARISING FROM THE CHEMICAL:
Product is acidic contains oxidizing agents. It may react with materials in the fire area, particularly if heated and mixed with caustics or reducing agents. Iodine may be present in the airborne vapor created during the fire.

HAZARDOUS THERMAL DECOMPOSITION PRODUCTS
Carbon dioxide, aldehydes, and iodine containing compounds.

SPECIAL PROTECTIVE ACTIONS FOR FIRE FIGHTERS
Keep containers cool; mist will be acidic and the product contains both surfactants and oxidizing agents. Any air contaminants are likely to be corrosive to skin and respiratory tract. Wear protective clothing and avoid contact.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTING
In the event of a fire where this product is present in quantity, wear full protective clothing and NIOSH-approved self contained breathing apparatus with full facepiece operated in the pressure demand or other positive pressure mode. Do not enter an area having containers of the product without self-contained breathing apparatus.

6. ACCIDENTAL RELEASE MEASURES

LAND SPILL RESPONSE:
Product is water based and reactive. Product in small quantities will immediately react with the land materials creating something less toxic than itself unless. The product will add iodine to the land. That may be of concern depending on the location.

WATER SPILL:
Product is water based and will immediately disperse. Control product dispersal as much as you can within the time immediately after the spill. The product is aquatically toxic and will have immediate effects on life in the water body if a significant amount is spilled.

RECOMMENDED DISPOSAL:
Disposal options may be dictated by other materials mixed with this material. Dispose of in accordance with local, state, and federal regulations using methods which consider recycling/reclamation. Neutralization and sewer disposal may be an option but verify with local municipality.

7. HANDLING AND STORAGE

Precautions for safe handling

Protective measures	Don appropriate personal protective equipment per Section 8 of this SDS. Do not handle until all safety precautions have been read and understood. Do not get into eyes or on skin or clothing. If a mist is created do not breathe mist. Wear appropriate respirator if a mist is created. Keep in original container or a product manufacturer approved alternate. Keep tightly closed when not in use. Store away from caustics and organics. Store under ambient conditions (close to 21 C) and atmospheric pressure.
Advice on general occupational hygiene	Eating, drinking, and smoking is prohibited when working with this product. Workers should wash hands prior to leaving work area and eating, drinking, or smoking
Conditions for safe storage, including any incompatibilities	Store in accordance with local regulations. Store with other oxidizing agents away from metals, and caustics. Keep container tightly closed when not in use. If material is transferred to a different container, verify the container can be

used with the product.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

CONTROL PARAMETERS
OCCUPATIONAL EXPOSURE LIMITS

Substance		Exposure Limit		
Sodium metaperiodate (TLV set for iodides in general measured as inhalable fraction and vapor and not specific for sodium metaperiodate)		Federal Government -	TWA: 0.01ppm 8 hrs.	STEL :
		CA Alberta Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA British Columbia Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Manitoba Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA New Brunswick Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Newfoundland & Labrador Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Northwest Territories Territory -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Nova Scotia Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Nunavut Territory -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Ontario Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Prince Edward Island Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Quebec Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Saskatchewan Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Yukon Territory -	TWA: 0.1 ppm 8 hrs	STEL :
Periodic Acid (TLV set for iodides in general measured as inhalable fraction and vapor and not specific for sodium metaperiodate)		Federal Government -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Alberta Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA British Columbia Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Manitoba Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA New Brunswick Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Newfoundland & Labrador Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Northwest Territories Territory -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Nova Scotia Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Nunavut Territory -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Ontario Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Prince Edward Island Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Quebec Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Saskatchewan Provincial -	TWA: 0.1 ppm 8 hrs	STEL :
		CA Yukon Territory -	TWA: 0.1 ppm 8 hrs	STEL:

APPROPRIATE ENGINEERING CONTROLS:
Provide adequate general and local exhaust ventilation to maintain levels below established exposure limits. Provide eyewash stations and safety showers if it is used in a fixed facility to material users if routinely using the product. Provide hand washing facilities for routine use by personnel using the material.

ENVIRONMENTAL EXPOSURE CONTROLS
Airborne emissions are expected to be minimal and below the need to control. Verify waste water generated through use of the product can be sewered prior to using the product and sewering the product. Product is corrosive to metals and is likely to degrade metal surfaces over periodic or long term contact.

INDIVIDUAL PROTECTION MEASURES
Hygiene Measures
Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking, and using the lavatory and at the end of the work period. Ensure eye wash stations are in close proximity to the work area. Provide hand wash facilities.

Eye/face Protection
Splash goggles and apron should be worn when pouring this material to avoid contact with the liquid. Hand protection is recommended when there is possible direct contact with the liquid. Glove choice should be appropriate for the chemical blend and the specific activity being performed. NOTE: nitrile gloves are a general purpose glove available in a wide variety of thicknesses and protect against most chemicals.

Skin Protection
Depends on the extent of expected exposure. Elbow length gloves suitable for acidic water based chemicals with oxidizing properties are recommended. Those with a predisposition to skin irritation should avoid direct skin contact with the product.

Body Protection
The need for full body protection depends on the use and production of mist and aerosols. If a wet environment is created, a disposable water repellent suit is recommended.

Respiratory Protection
Product is not sufficiently volatile to be hazardous in vapor form. If creating a mist, the airborne product levels could exceed exposure standards. Respiratory protection should be suitable for both acids and oxidizers. Consult your safety supplier as to appropriate available respiratory protection.

EXPOSURE EVALUATION:
Exposures depend on activities being performed and the ventilation in the area.
Personal exposure monitoring can be performed by the employer to determine his/her employee exposures to the product during routine use at the facility. It is beyond the responsibility of the product supplier to estimate/determine airborne exposure in a user's facility.

9. PHYSICAL AND CHEMICAL PROPERTIES

Vapor Pressure:	Not Determined	**Vapor Density:**	Heavier than air
Specific Gravity:	1.03	**Evaporation Rate:**	Not Determined
Solubility in Water:	Soluble	**Freezing Point:**	Not Determined
Melting Point:	**Not Applicable**	**Odor:**	Mild
pH:	2 - 2.5	**Appearance:**	Clear
Boiling Point:	100°C/212°F	**Physical State:**	Liquid
Viscosity:	Not Determined	**Flammable Range:**	Not Applicable
Flash Point:	>93°C	**VOC content:**	Not Applicable
Decomposition temp:	Not Determined	**Odor Threshold**	Not Determined
Partition coefficient: n-octanol/water	Not Determined	**Viscosity:**	<10 cps

10. STABILITY AND REACTIVITY

REACTIVITY
Sodium metaperiodate and Periodic acid components are oxidizers and may intensify a fire by providing oxygen under the right conditions.

CHEMICAL STABILITY
This product is stable if kept in its container and not mixed with other chemicals.

POSSIBILITY OF HAZARDOUS REACTIONS

INCOMPATIBLE MATERIALS AND CONDITIONS TO AVOID:
Combustible materials, reducing agents, organic materials, caustics.

CONDITIONS TO AVOID
Avoid storing or mixing with incompatible materials as heat and possible air contaminants could be generated.

INCOMPATIBLE MATERIALS
Caustics and reducing agents.

HAZARDOUS DECOMPOSITION PRODUCTS:
None if stored properly and not mixed with incompatible chemicals.

11. TOXICOLOGICAL INFORMATION

ACUTE TOXICITY

Component	Acute Test	Value	Species
Sodium Metaperiodate	LD50 intraperitoneal	58 mg/kg	Mouse
Sodium Metaperiodate	EPISKIN Human Skin Model Test	Corrosive Category 1C (exposures between 1 and 4 hrs with observations up to 14 days)	
Sodium Metaperiodate	LD50 oral	264 mg/kg	Rat
Periodic Acid	LD50 oral est.	1 ml/kg	Human
Periodic Acid	LD50 oral	132 mg/kg	Rat
1,1'-oxybisbenzene tetrapropylene derivatives, sulfonated, sodium salts	LD50 oral	>2000 mg/kg	Mouse

IRRITATION/CORROSION
Acidic pH, oxidizing agents, and surfactants will cause irritation to eyes, skin, and respiratory tract.

SENSITIZATION
No components are identified as sensitizers.

MUTAGENICITY
No mutagenic components identified in the product.

CARCINOGENICITY
No carcinogenic components identified in the product.

REPRODUCTIVE TOXICITY
No reproductively toxic components identified in the product.

TERATOGENICITY
No teratogenic components identified in the product.

STOT - SINGLE EXPOSURE
The acidic pH in combination with oxidizing agents and a surfactant makes this material irritating on prolonged single exposure.

STOT - REPEATED EXPOSURE
Repeated exposure does not create more adverse conditions other than repeated exposure to an iodine containing compound and its effects on the thyroid.

ASPIRATION HAZARD
Not an aspiration hazard.

POTENTIAL ACUTE HEALTH EFFECTS

Eye contact	Acidity, oxidizers, and surfactant makes it corrosive to the eyes.
Inhalation	Inhalation as an aerosol/mist can be corrosive to the respiratory tract.
Skin Contact	Acidity, oxidizers, and surfactant makes it irritating to the skin; potential skin sensitizer
Ingestion	Expected to be corrosive to the digestive tract with ingestion of significant iodine.

SYMPTOMS RELATED TO THE PHYSICAL, CHEMICAL AND TOXICOLOGICAL CHARACTERISTICS

Eye contact	Immediate irritation
Inhalation	Irritation to nose, throat, lungs
Skin contact	Redness and irritation
Ingestion	Possible irritation to the digestive tract if sufficient amount is ingested.

DELAYED AND IMMEDIATE EFFECTS AND ALSO CHRONIC EFFECTS FROM SHORT AND LONG TERM EXPOSURES

Short term exposure

Potential immediate effects	Irritation
Potential delayed effects	Irreversible damage to the exposed skin area

Long term exposure

Potential immediate effects	Irritation
Potential delayed effects	Over exposure to iodine; contact dermatitis

POTENTIAL CHRONIC HEALTH EFFECTS

General	Over exposure to iodine

NUMERICAL MEASURES OF TOXICITY

Acute toxicity estimates	acute toxicity point estimate (ATE)
Route	
Oral	50
Dermal	50
Inhalation	0.05 - mist

12. ECOLOGICAL INFORMATION

TOXICITY

Species	Test Information	Concentration	Component
Oncorhynchus mykiss (rainbow	semi-static LC50	>0.17 mg/l-96hr	Sodium periodate
Daphnia magna (Water flea)	static test LC50	>0.18 mg/l-48hr	Sodium periodate
Fish	LC50 - 4 days	170 ug/l	Periodic Acid
Aquatic invertebrates	EC50 - 48 hr	180 ug/l	Periodic Acid
Aquatic Algae	EC50 - 72 hr	2.5 mg/l	Periodic Acid
Freshwater	PNEC	0.013 mg/l	Sodium Dodecyl Diphenyl Oxide Disulfonate
Marine Water	PNEC	0.001 mg/l	Sodium Dodecyl Diphenyl Oxide Disulfonate
Aquatic invertebrates	NOEC - 48 hr	99 ug/l	Periodic Acid

PERSISTENCE AND DEGRADABILITY

Expected to biodegrade in the environment contributing iodine to the environment.

BIOACCUMULATIVE POTENTIAL

No data available but not expected to bioaccumulate.

MOBILITY IN SOIL

Soil/water partition coefficient (K_{oc})	No data available
Mobility	No data available

OTHER ADVERSE EFFECTS

Contributes iodine to the environment.

13. DISPOSAL CONSIDERATIONS

DISPOSAL METHODS

Generating waste is to be avoided and/or minimized whenever possible. Disposal of this product, solutions and any by-products should comply with the local regulatory requirements. Waste from use of this product is likely to be able to be disposed of through the sewer system but verify this with local authorities prior to adopting this method of disposal. Unused, excess material beyond its manufacturer shelf life should be disposed of in accordance with local regulatory requirements.

14. TRANSPORT INFORMATION

Consolidated Transportation of Dangerous Goods Regulations including Amendment SOR/2019-101

TDG Classification	RB Emulsion Remover
UN Number	UN3264
Shipping Name and Description	CORROSIVE LIQUID, ACIDIC, INORGANIC, N.O.S. (Periodic Acid, aqueous solution with not more than 8% Periodic Acid)
Transport Hazard Class	8
Packing Group Category	III
Special Provisions	16
Explosive Limit and Limited Quantity Index	5 L
Excepted Quantities	E1
ERAP Index	blank
Passenger Carrying Vessel Index	blank
Passenger Carrying Road Vehicle or Passenger Carrying	5L

INTERNATIONAL AIR TRADE ASSOCIATION (IATA)

IATA 58th Edition Information	RB Emulsion Remover
UN Number	UN3264
Proper Shipping Name Description	CORROSIVE LIQUID, ACIDIC, INORGANIC, N.O.S. (Periodic Acid, aqueous solution with not more than 8% Periodic Acid)
Class or Division	8
Hazard Label(s)	Corrosive
Packing Group	III
EQ - 2.6 Dangerous Goods in Excepted Quantities	E1
Passenger Aircraft - Limited Quantity Packing Instructions	Y841 - substances must be compatible with their packagings as required by 5.0.2.6; metal packagings must be corrosion resistant or with protection agains corrosion; closures must meet the requirements of 5.0.2.7. inner packaging construction/net quantity per inner packaing - glass - 0.5L, metal - 0.5L; plastic - 0.5L; total net quantity per package - 1L
Passenger Aircraft - Limited Quantity Max net Qty/Pkg	1 L

Passenger Aircraft - Packing Instructions	**852 - substances must be compatible with their packagings as required by 5.0.2.6; metal packagings must be corrosion resistant or with protection against corrosion; closures must meet the requirements of 5.0.2.7; packagings must meet Packing Group II performance standards. inner packaging construction/net quantity per inner packaging - glass - 2.5 L; metal - 5L; Plastic - 2.5 L. total net quantity per package - 5L.**
Passenger Aircraft - Quantity Max Net Qty/Pkging	**5 L**
Cargo Aircraft only - Packing Instructions	**856 - substances must be compatible with their packagings as required by 5.0.2.6; metal packagings must be corrosion resistant or with protection against corrosion; closures must meet the requirements of 5.0.2.7; packagings must meet Packing Group II performance standards. construction/net quantity per inner packaging - glass - 5L; metal - 10 L; plastic - 5 L; total per package - 60L**
Cargo Aircraft only - Max Net Qty/Pkging	**60 L**
Special Provisions 4.4	**None**
ERG Code	***8 L***

INTERNATIONAL MARITIME DANGEROUS GOODS CODE (IMDG CODE)

IMDG 2016 EDITION	**RB Emulsion Remover**
UN Number	**UN3264**
Proper Shipping Name Description	**Corrosive liquid, acidic, inorganic, n.o.s. (Periodic Acid, aqueous solution with not more than 8% Periodic acid)**
Class or Division	**8**
Subsidiary Risks	**Blank**
Packing Group	**III**
Special Provisions	**223,274**
Limited Quantities	**5 L**
Excepted Quantities	**E1**
Packing Instructions	**P001, LP01**
Packing Provisions	**Blank**
IBC Instructions 4.1.4	**IBC03**
IBC Provisions 4.1.4	**Blank**
Portable tanks and bulk containers - tank instructions	**T7**
Portable tanks and bulk containers - provisions	**TP1, TP28**
EmS	**F-A, S-B**
Stowage and Handling	**Category A, SW-2**
Segregation	**Blank**
Properties and observations	**Causes burns to skin, eyes, and mucous**

SPECIAL PRECAUTIONS FOR USER

Transport within user's premises: always transport in containers that are upright upright and secure and appropriate for this product.
Ensure that persons transporting the product are trained in spill or accident prevention.

15. REGULATORY INFORMATION

CANADIAN LISTS

Canadian NPRI	**The following components are listed: NONE**
CEPA Toxic Substances	**The following components are listed: NONE**
Canada Inventory	All components are listed or exempted.
