First time Anavar user (Oxanavar 10mg)

The recommended dosage is 40-60 mg per day for males and 5-20 mg per day for females. Due to its short half-life, it is best to split up the daily dosage into an AM and PM dosage. If M1T is the most potent Methyl Steroid and it's dosed as high as 30mg, I don't see why M4OHN can't be. Now I know it's apples to oranges, but there aren't side effects even at 10 + mg. I have some of the HM Gear M4OHN coming in tomorrow. Again, they suggest up to 40mg a day (in two doses however) Gaspari suggests up to 15mg, but no more.

Anavar Oral: Uses, Side Effects, Interactions, Pictures ...

This medication is used to help people regain weight they have lost due to certain medical conditions (such as surgery, chronic infection, trauma, long term use of corticosteroid medication such as.

OXANAVAR is a prescription strength Pro-Anabolic Mass builder, with one of the highest Anabolic to

Androgenic ratios. Oxanavar significantly raises testosterone, dramatically suppresses cortisol and blocks estrogen receptors. Oxanavar is highly bio-available similar to 17-methylated Pro-steroids. [read full article](#)

KiloSports OxanaVar - AnabolicMinds.com

A new drug that's 10 times more anabolic (to muscles!) than Long-R3 IGF-1 and totally resistant to liver destruction. Oh, and burns fat almost as well as DNP! Which hormone, when injected, will increase muscle mass by 20% in only 14 days (that means a 250 lb bodybuilder will weigh 300 lbs in less than 2 weeks!)

KiloSports OxanaVar - AnabolicMinds.com

This is because Anavar has a short half-life (9-10 hours), so to make the most gains from your cycle, you'll want to keep high levels of oxandrolone built up in your system. Therefore, if you want to take 10mg/per day, you would take 2 x 5mg tablets. In this case, it would be easier to buy smaller 5 mg pills.

OxAnivar, (legal Anavar alternative) is a steroid with a light anabolic effect contributing to muscle mass growth. The benefit of adding this steroid to a cycle is adding dry mass gains without getting excess body fat and with minor water retention. ANAVAR 10 10 mg. Oxandrolone. Hi. [killer deal](#)
