

Philips GoSure 3000 series
GoSure 3001

Collision detecting G-sensing

Driver fatigue alert

Reliable high-quality image

Fully automated operation

GS300X1

Your personal road safety guardian

ADAS with collision detection and fatigue alert

You could enjoy a safer trip with fatigue alert driver assistance. Moreover, with quality images day and night, Philips GoSure 3001 provides you with clear details in case the unexpected happens.

Collision detecting G-sensing

- G-sensor detects collisions, triggering emergency mode

Driver fatigue alert for a safer drive

- Automatic driver fatigue alert warning

Reliable high-quality image

- Full-HD 1080p sharp image to capture major road events*1
- 132° angle coverage, recording up to 3 lanes of traffic *2
- Image sensor quality and F/2.0 lens for better night view

Hassle-free and fully automated operation

- Wireless connectivity for easy operation
- Automatically starts recording when activating the engine

PHILIPS

Specifications

Product description

- Aperture Range: F/2.0
- Automatic recording
- Collision detection
- Date and time stamp
- Designation: GoSure 3001
- Driver fatigue alert
- Driver fatigue alert warning
- Emergency recording file
- External memory: SD card(class 10, Up to 64GB)
- File Format: .MP4, H.264 video compression
- Fixed Lens: 132° super wide angle
- G-sensor
- Image Sensor: CMOS
- Interface: Micro USB, Speaker, Microphone
- Internal Memory: SPI Nor flash 8MB
- Languages: English
- Operating Temperature: -10 ? ~ 60? °C
- Power: <3W W
- Power [W]: <3W
- Random Access Memory: 512Mb DDR3
- Recording Time: 170min @16GB in full HD
- Seamless loop recording
- Storage Temperature: -20? ~ 70?

- Video resolution: Full HD 1080p
- Video resolution: Full HD 1080P
- Voltage: 5V DC V
- Voltage [V]: 5V DC
- Driver fatigue alert
- Seamless loop recording
- Collision detection

Logistic data

- EAN: '6974260729176
- Quantity in box: 10
- GOC: '72917630
- Order entry: GS300X1

Accessories included

- Accessories: Power cable
- Power cable length (m): 3.6m

Weight and dimensions

- Product dimensions (L x W x H): 98mm*43mm*30mm mm
- Box weight (incl. product) (g): 227g
- Product weight (g): 78g

Highlights

Collision detecting G-sensing

Equipped with a 3-axis G-sensor module, the Philips GoSure 3001 detects movement and triggers an emergency mode. During a collision that exceeds a certain force threshold, the device will lock that videos in specified folder to better secure the evidence.

Driver fatigue alert

Drivers who are tired and unaware often find themselves in dangerous situations on the road. In EU Fatigue report 2018, a study demonstrates that, when driving 2-4 hours, a rest break will help restore driver's attention and operating performance. The Philips GoSure 3001 features an effective Advanced Driver Assistance System (ADAS) as it has an algorithm that calculates the hours spent driving. When the fatigue index gets too high and the driver should be taking a rest, the device will alert the driver with a voice warning message.

Full-HD 1080p sharp image*1

With its full HD 1080p video capabilities, the Philips GoSure 3001 captures sharp and vivid details on the road. You'll get clear images of the actions of other drivers, including the ability to capture license plate numbers.*1

Super wide angle coverage

Capture more of the scene ahead with a proven 132 super wide angle lens for the camera*2. Philips GoSure 3001 is able to cover to three lanes of traffic, helping you gain a more complete picture of any incident on the road.

High quality image sensor

The Philips GoSure 3001 is equipped with a highly sensitive image sensor and bright F/2.0 lens. This helps you capture a sharp, high quality image of your journey, even when driving at night or in other low-light conditions.

Wireless connectivity via APP

With the built-in 2.4GHz Wi-Fi, you can enjoy a comfortable live streaming of videos on your smartphone by connecting to third party APP. With wireless connectivity, it allows smart control and easy operation.

Automatic operation

When using the car, your first action is turning on the engine. Philips GoSure 3001 always starts working automatically when the engine is turned on. The device also switches off automatically when the engine is off. You could drive away with peace of mind, knowing that your GoSure 3001 works immediately and captures your entire journey in vivid detail.
