

Personal Ultrasonic Jewelry Cleaner SparkleSpa®

GEMORO
PRODUCTS™
The Sparkle Experts

Instructions for Use
& Safety Precautions
FOR INDOOR USE ONLY

IMPORTANT: Before using the SparkleSpa, please be certain to read the following pages including the specified safety precautions.

ADVANCED PROFESSIONAL FEATURES:

- True professional grade ultrasonic jewelry cleaner for the home
- Approximate 20oz (600ml) tank capacity
- Powerful 42,000Hz energy producing sound waves per second
- Digital timer
- Auto shut-off function
- 3 Cleaning cycle options - 3, 5 and 10 minutes
- Safely cleans most jewelry using tap water or for best results, add GemOro SparklePak Plus cleaning solution to the water (Item #0935 sold separately)
- Bright blue LED illuminated stainless steel tank
- Transparent evaporation-free cover
- Quiet solid-state circuitry
- Elegant European contoured design in designer white pearl color
- Removable basket and bracelet / watch holder included
- 50 / 60HZ
- One Year Limited Replacement Warranty

GemOro SparkleSpa

1. Ultrasonic tank
2. Transparent evaporation-free cover
3. Control panel: ON, OFF and SET (Timer) buttons
4. Blue LED tank illuminator light
5. Removable basket
6. Bracelet / watch holder

THE FIVE BASIC STEPS:

STEP 1 – Unpack the SparkleSpa, basket and bracelet / watch holder from its box and plastic wrapping.

STEP 2 – Connect to electrical power source. DO NOT turn the ultrasonic on unless you have first filled up the tank with water.

STEP 3 – To open the SparkleSpa transparent cover, lift the handle that is located above the LED digital display to expose the tank. Add the appropriate amount of water and /or mixture of water and optional SparklePak Plus packet to the tank. Fill the solution level to the MAX fill line as clearly marked on the rear center portion of the stainless steel tank wall. DO NOT allow the water to evaporate below this level or fill the tank above this level as damage may occur and the warranty will become void. For general cleaning, while regular tap water may be used, for enhanced results we recommend adding GemOro SparklePak Plus cleaning solution to the water. SparklePak Plus uses special brighteners and cleaning agents, and is known as the best ultrasonic jewelry cleaning solution available. DO NOT use flammable liquids, ammonia or acid / water mixtures in the ultrasonic tank as damage may occur and the warranty will become void. Keep the evaporation-free cover closed when not in use to reduce solution evaporation.

STEP 4 – BEFORE CLEANING JEWELRY READ SECTION “What May & May Not Be Cleaned In An Ultrasonic”. Place the item to be cleaned in the supplied basket and then submerge it in the tank and close the cover. (As a suggestion, in the event small items such as diamond ear studs, charms or small pieces of jewelry require cleaning, a household stainless steel tea strainer or fine mesh stainless steel basket may be used to hold these items safely during the cleaning process, with the tea strainer then being placed in the supplied basket.) GemOro Diamond Saver Basket (sold separately Item #5702) is recommended. To clean bracelets or metal watchbands, use the included holder that is designed for this function, while placing the holder in the basket to prevent it from touching the bottom of the tank. The watch holder will also prevent the head / movement of the watch from being submerged. **DO NOT** place items to be cleaned directly on the tank bottom as damage to the transducer may occur. Damage to the transducer as a result of placing items on the bottom of the tank will void the warranty. Dents and scars on the tank’s bottom are evidence of items being placed inappropriately in the tank without a basket.

STEP 5 – Press the ON button to start the cleaning process. While on, press the SET button to scroll through the three cleaning cycle times of 3, 5 or 10 minutes. Once the cleaning cycle has ended the ultrasonic will automatically shut off. Items that require additional cleaning may be left in the basket

within the tank and the process repeated. Once the cleaning process has been completed, always rinse the item off with tap water to remove the remaining solution (as it may irritate your skin) and to dislodge / remove any remaining loosened dirt from its surface. DO NOT place fingers or other body parts in the tank while the ultrasonic is operating.

IMPORTANT: READ THIS SECTION BEFORE CLEANING JEWELRY

WHAT MAY & MAY NOT BE CLEANED IN AN ULTRASONIC

- Typically, items such as gold, silver, platinum, diamonds, rubies, sapphires, amethyst, citrine etc., are safe for ultrasonic cleaning. Be careful not to clean stones that may have many inclusions (example: emeralds), because the ultrasonic sound waves coupled with the sudden change in temperature may crack the stone. Be certain not to clean soft, water porous stones (such as pearls, opals, turquoise, amber, ivory etc.) as they too may be damaged. For additional or more specific information on which stones are suitable for cleaning in an ultrasonic other than what is listed below, we suggest you contact a professional jeweler, gemologist or The Gemological Institute of America (GIA). It is recommended that you do not place micro-pave set diamond jewelry in an ultrasonic. To clean metal watchbands, use the included holder that is designed for this

function, while placing the holder in the basket to prevent it from touching the bottom of the tank. Watches should be placed on the holder with the head / movement of the watch suspended above the water in the tank to prevent potential damage due to a possible poor water seal or weak gasket in the watch. Never place a non-waterproof watch in water or in this ultrasonic and only place the metal band of the watch in the water. At your own risk, before attempting this, always be certain the watches stem is fully inserted and / or screwed all of the way in.

- Clean the tank and change the solution periodically, but **ONLY** after first unplugging the SparkleSpa to avoid potential electrocution.
- With the SparkleSpa unplugged, take the basket out of the tank and then grasp the ultrasonic with both hands and with the cover open. Then carefully pour out the old solution into your sink and drain. Wash all dirt and residue from the tank's bottom with clean tap water and a standard household non-ammoniated, non-acidic cleaning solution or stainless steel cleaner and a paper towel. Rinse the tank out with clean tap water while being careful not to allow water to overflow onto other parts of the machine as damage to its electronics may result and the warranty will become void.
- The SparkleSpa's outer shell may also be cleaned using a

standard household non-ammoniated, non-acidic, non-abrasive cleaning solution suitable for use with ABS plastic and a paper towel. After cleaning the outer shell, wipe off the remaining solution with clean tap water. Avoid placing too much cleaning solution on the outer shell as the excess solution may seep into the ultrasonic's electronics potentially causing damage. DO NOT submerge the SparkleSpa into water as damage to its electronics may result and the warranty will become void.

WARRANTY

Congratulations on your purchase of the GemOro® SparkleSpa personal ultrasonic jewelry cleaner! In the unlikely event of a defect in material or workmanship of the unit, your ultrasonic features a ONE YEAR LIMITED REPLACEMENT WARRANTY. This warranty is valid from the date of its purchase assuming the purchaser fills out the WARRANTY REGISTRATION FORM at www.gemoroproducts.com/warrantyregistration within 30 days of its purchase. If this criterion is not followed, the SparkleSpa will automatically be covered by a 90 DAY LIMITED WARRANTY from the date your ultrasonic was purchased, as noted on the bill of sale (if supplied) or through the SparkleSpa serial number tracking system as interpreted by the factory. In the event the SparkleSpa is no longer available or has been discontinued and warranty coverage is applicable, at the factory's sole discretion, an equivalent ultrasonic cleaner may be substituted in place of the defective SparkleSpa. The purchaser shall incur the cost for return postage, insurance and handling for all warranty and non-warranty repairs. Warranty repairs and/or replacements will be shipped back to the customer FOB Destination to the location of the customer's choosing if within the Continental United States (U.S.). Non-warranty repairs will be shipped back to the customer FOB Factory. Should the customer require the repair and / or replacement unit(s) to be shipped outside the Continental U.S., the customer will be required to pay any related shipping charges and any related taxes/duties for the respective

destination country, regardless of whether it is a warranty or non-warranty claim.

IMPORTANT DISCLAIMER: No warranties exist with respect to the SparkleSpa or its use other than those expressly contained herein. All other warranties of any kind or character whatsoever, whether expressed or implied, including warranties of merchantability or fitness for a particular purpose, are hereby disclaimed and are excluded from the warranties hereunder. In the event that a claim is made with respect to the SparkleSpa or its use, the maximum liability of GemOro, and its affiliates, dealers and distributors shall be the amount paid for the SparkleSpa.

GemOro BrilliantSpa®

BLACK DIAMOND Deluxe Personal Jewelry Steam Cleaner

New larger capacity steamer with even greater steam pressure!

Cleans more & cleans faster – The best just got better!

- Professionally cleans diamonds, gold, silver and platinum jewelry
- Perfect size approximate 1-pint tank capacity steam cleaner
- Powerful steam cleaner safely generates a robust 50PSI of pressurized steam
- Using regular tap water safely blasts away dirt, grime, body oil, makeup and more
