

## Kodiak Canvas Camp Quilt

Thank you for your purchase of a Kodiak Canvas Camp Quilt.

Included here is some info to help you get the most out of your new quilt. Your Kodiak Canvas Camp Quilt has our Factor-4™ hollow fiber polyester insulation, similar to the insulation found in high-end sleeping bags. It is light and fluffy and very warm. Most bedding-grade quilts are made with inferior polyester batting that just does not compare.

Use your Camp Quilt as an alternative to a sleeping bag. You can fold it like a taco. You can buy two and use one on the bottom and one on top. You can use the Camp Quilt as a blanket or comforter on a bed in your cabin, RV, or even home. The handy carry bag makes it easy to store and transport. Take one on a picnic or to a sporting event. We hope this will become your new favorite blanket.

### Care

It is best to store it loosely folded or rolled. When you get to camp, unpack your quilt and give it some time to decompress before sleep. The best way to freshen up your quilt is to hang it outside and let it air out. You should very seldom wash your quilt, and only when absolutely required. Hand wash in cold water. Use a minimal amount of mild detergent. Rinse thoroughly. Hang dry. Alternatively, your quilt can be washed in an oversized, commercial, front-load washer. Do not use a top load washer. Gentle wash in cold. Use a minimal amount of mild detergent. Cold rinse. Tumble dry in an oversized dryer at low heat. Dry the quilt completely before storage. Do not use bleach. Do not iron. Do not dry clean. After you have had a chance to use your new Kodiak Canvas Camp Quilt, we would love to hear from you. Please give us an honest review, and a shout out on social media. Happy camping!
