

48 BIT COLOR

VIVID PICTURE QUALITY & HDR

Dolby® DTS® -HD

UP TO 7.1 SURROUND SOUND

60 Hz

SMOOTH TRANSITION & HIGHER FPS

eARC AUDIO

(eARC) AUDIO RETURN CHANNEL

HIGH PERFORMANCE

HDMI fiber optic cable meets HDMI v2.0 Testing Specifications, supporting HDR, 3D, HDCP 2.2, CEC, EDID and ARC (Audio Return Channel), EMI-FREE and no signal loss in high noise environment.

UNIDIRECTIONAL / ACTIVE FIBER CABLE

Cable must be installed in the correct direction: "source" end is connected to Blu-ray player, AVR, PS4, Xbox; "display" end is connected to your TV/projector.

LIGHT, FLEXIBLE AND WITHOUT POWER SUPPLY

The cable is very light and flexible, unlike the traditional copper HDMI cable which is pretty heavy. Also no power supply is required at this length.

WIDE APPLICATION

Immune to EMI & RFI from appliances and wireless device, you can get precise, natural audio/video over long distance in home theater system, exhibition center, international conference, surveillance, data center, DIRECTV, gaming or virtual reality environment, etc.

The ultimate solution for high definition picture and sound. Our cables feature epic 4K picture quality with HDR imaging and high speed transfer rates of up to 18 Gbps to keep you in the action. Modern 24K gold plated connectors keep your cables snugly in their place and help ensure the best connection possible. 60 Hz ultra smooth transitions keep frame rate flowing so you never lose another match to lag. Top it off with a state of the art eARC return channel and up to 7.1 Dolby Digital surround sound and you're ready to rock. Unleash our best and make your streaming experience unforgettable with a new UHD Premium One Fiber Optic 4K HDMI Cable
