UPC: 810054152088

The ONE Home Collection Soft Roller Head is an attachment that excels when it comes to hard flooring. It is a versatile attachment where it can pick up dirt, dust, and bacteria in between crevices with its brush. It is compact in size and with the ±90° swivel, it can fit into hard to reach places like under couches and gaps in between furniture. See in dark areas of your floor with the LED lights attached in the front.

The roller itself is detachable and washable. Simply unlock it from the side of the attachment and remove the roller. Hand wash only as this may cause complications within a washer.
