Fixed Frame Projector Screens are among the most popular projector screens. The OPFIX120 is perfect for your home theater setup, business meetings, and more! With its 16:9 screen format and diagonal 304.8cm of screen, enjoy the view from any angle. The projector screen features a 1.1 gain reflectivity, enhancing the movie watching experience. The amazing quality of the OPFIX120 screen's reflective properties bring the vibrant colors to life and high-resolution images produced by your projector.

OPFIX120 are easy to install projectors and can be assembled with just one person. The OPFIX120 screen's frame is constructed from strong aluminum alloy with light-absorbing, projection fabric, and black velvet material for spectacular viewing images. The screen easily attaches to the frame, creating just the right amount of tension on the screen, preventing any wrinkles in the screen and produces a flawless viewing.

Bring home an OPFIX120 Fixed Frame Projection Screen today and start your ultimate viewing experience.
