The OPMOTO100 is a motorized, remote control electric projector drop down screen. With a touch of a button, easily convert your living room into a home theater or make presentations that leave a lasting impression in the boardroom.

With its sleek appearance, the motorized projector fits in any environment it is installed in. The OPMOTO100 is super easy to install. The screen protector is housed in an elegant aluminum alloy, protecting the screen whether you decide to install on the wall or on the ceiling.

Once installed, it is ready to operate with a simple switch. The motorized projector screens are equipped with manual switch or an external wireless remote control. The OPMOTO100 is engineered with a Tubular Motor, allowing the high-quality screen to unroll without any loud noises.

Once it is all unrolled, sit back and relax with all 254cm of screen. Our high-quality screens reflect light evenly and provides 160° wide-angle motorized screens producing outstanding, crisp images from all angles enhancing your viewing experience.
