ONE Home Collection Ceramic Fan Heater will keep your living space nice and cozy. With the remote, control the temperature of your room while never leaving your spot. The slim design can fit snug in a corner on a bed side or next to a couch. Using a built in oscillating fan, this heater can spread heat evenly through out the room. Made of sturdy ceramic, this heater is built to last free from warping or cracking from the heat, while giving a stylish look.

Keep yourself and your family safe with protection system. When reaching a certain temperature, the heater will turn off. When tipped over, the heater will turn off until put upright. The ONE Home Collection Ceramic Fan Heater is best used in living rooms, bedrooms, offices, or any personal spaces.
