

OASIS 250 Water Storage Systems

28"x36"x81" 80 lbs empty

Read Instructions and warnings
on back before installing

INSTALLATION

STEP 1: PREPARE PRODUCT

1. Remove all packaging
2. Remove blue bulkhead plugs
3. Remove items from packet on or under lid
4. Rinse tank with potable water

STEP 2: INSTALL FAUCET

1. Tighten large bulkhead nuts by turning counter-clockwise
2. Evenly apply pipe thread sealant to larger faucet threads
3. Carefully turn faucets clockwise into bulkhead (Caution: do not cross thread)
4. Ensure bottom faucet is positioned horizontally (see illustration)
5. Securely tighten faucets using wrench

Note: Your faucet may already be installed, If so, proceed to step 3

IMPORTANT:

Ensure faucet is screwed straight into bulkhead to avoid cross-threading and damaging bulkhead.

Cross threaded bulkheads will require a replacement. They can be purchased at rockwellwater.com

STEP 3: PREPARE SITE

1. Ensure installation location is level, free from sharp objects, and can hold over 2335 lbs
2. We recommend placing a Rockwell leach barrier under the tank
3. Allow for 2 inches of clearance on all sides
4. Store out of direct sunlight to maximize tank life

Do Not Stack Tanks

STEP 4: FILL TANK

1. Use key to fully close faucets
2. Remove and clean lid
3. Fill with water using sanitary grade drinking hose
4. While filling, closely monitor the tank for leaks, overflow, and spills
5. Tighten bulkhead nut and faucet if you notice leaking
6. Reinstall lid
7. Apply rotation schedule (see Illustration)
8. Store key in key holder (see illustration)
9. Rotate water according to rotation schedule

STEP 5: DRAINING

1. Connect hose to faucet
2. Use hose to drain
3. Open faucet using key
4. Drain water
5. Tilt tank to remove excess water
