Hemp Yarns

HempTex India focuses on manufacturing hemp blended yarns in India. Hemp is deemed to be the plant kingdom's most sustainable resource for one of the strongest natural fibres on the planet.

Our goal is to head towards zero waste model and eventually be a part of a circular economy.

Why Hemp?

Anti-bacterial

Strongest natural fiber on the planet

Carbon negative

Breathable

UV-resistant

Absorbs odour

Gets better with every wash

Requires far lesser water to grow than other natural fibers

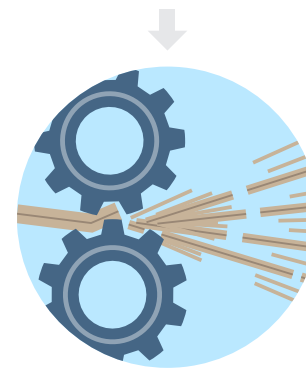

Hemp yarns are extremely versatile and can be used for several products such as upholstery, apparel, accessories, shoes, furniture, performance wear and more.

Products made from hemp incorporate all beneficial qualities including bacterial resistance and zero biotoxins. It is also likely to last longer and withstand harsh conditions. In addition, hemp fabric is stronger than any other natural fibre and is hypo-allergenic, moisture absorbent, fire retardant, a good insulator and UV resistant.

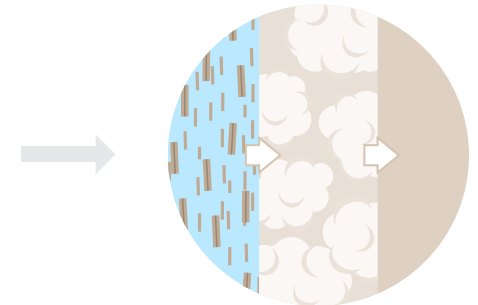

Hemp Yarn Making Process

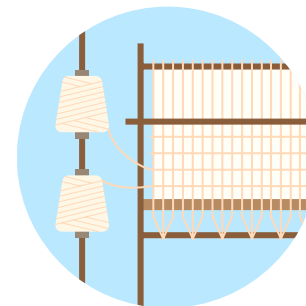

Step 1: Harvesting
Harvesting of Industrial Hemp

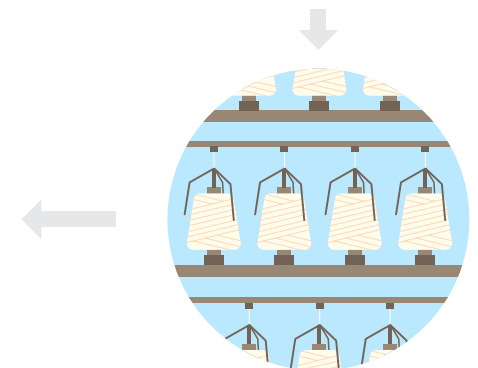

Step 2: Decorticating
Industrial Hemp has bast fibers which need to be decorticated for further processing

Step 3: Degumming & Retting
Hemp fibers then go through the process of degumming and retting, which turns it into carded and cottonized fiber

Step 4: Weaving & Knitting
These carded and cottonized fibers are then processed for spinning into yarns

Step 5: Spinning
The yarns are then used for the process of weaving and knitting of hemp fabric

We provide a variety of hemp blended yarns.
