

CURRICULUM / CONTENT

Cervical Proprioception, Postural Reflexes and Neck Pain

1. Introduction
 2. Cervical Sensorimotor Control
 3. Proprioception
 4. Sensorimotor Function
 - 4.1. General
 - 4.2. Reflexes
 - 4.2.1. General
 - 4.2.2. The Vestibulocollic and Cervicocollic Reflex
 - 4.2.3. The Cervicoocular Reflex (COR) and the Vestibuloocular Reflex (VOR)
 - 4.2.4. Retained (or Reappearance of) Primitive Reflexes with Influence on the Cervical Spine
 - 4.2.4.1. General
 - 4.2.4.2. The Tonic Neck Reflexes
 - 4.2.4.2.1. The Asymmetric Tonic Neck Reflex (ATNR)
 - 4.2.4.2.2. The Symmetric Tonic Neck Reflex
 - 4.2.4.3. The Moro Reflex
 - 4.2.5. Some other Reflexes that can Influence Cervical Pain
 - 4.2.5.1. The Optokinetic Reflex (OKR)
 - 4.2.5.2. The Tonic Labyrinthine Reflex (TLR)
 - 4.2.5.3. Trigemincervical Reflex (TCR)
 - 4.3. Lesions in the Cervical Spine
 5. Testing for Cervical Proprioceptive Impairment and Sensorimotor Control Disturbances
 - 5.1. Cervical Joint Position Error (JPE) Test
 - 5.2. Postural Sway or Balance
 - 5.3. Other Tests
 6. Techniques to Improve Cervical Proprioception
 - 6.1. Local Vibrations on the Suboccipital Muscles
 - 6.2. Cervical Joint Position Error (JPE) Technique
 - 6.3. Cervical Joint Position Error (JPE) Technique in Rotation
 - 6.4. Cervical Joint Position Error (JPE) Technique in Sidebending
- Bibliography
- Acknowledgment
