

CURRICULUM / CONTENT

Cerebrospinal Fluid and its Influence on Health

1. Introduction

2. Location and Movement

3. Production and Resorption of the Cerebrospinal Fluid

3.1. *Classical Hypothesis*

3.2. *Bulat – Klarica – Oreskovic Hypothesis*

3.3. *Blood – Brain Barrier (BBB)*

3.4. *The Glymphatic System*

4. Functions of the Cerebrospinal Fluid

5. Pathology of the Cerebrospinal Fluid

5.1. *Hydrocephalus*

5.2. *Meningitis*

5.3. *Subarachnoid Hemorrhage*

5.4. *Pseudotumor Cerebri Syndrome*

5.5. *Perioperative Neurocognitive Disorder (PND)*

5.6. *CSF Leak*

5.7. *Intracranial Hypotension*

5.8. *Stasis of Cerebrospinal Fluid*

6. Influencing the Cerebrospinal Fluid

7. Assessment or Analysis of the Function of the Cerebrospinal Fluid

7.1. *Classical Analysis*

7.2. *Manual Assessment and Case History*

8. Osteopathic Approach

8.1. *General*

8.2. *Cardiovascular Approach*

8.3. *Membranous Approach*

8.3.1. *Adolescents and Adults*

8.3.2. *Observation of the Face and Skull*

8.3.2.1. *What and How We Observe*

8.3.2.2. *Normal Proportions*

8.3.2.3. *Frontal Plane Dysfunctional Proportions*

8.3.2.4. *Horizontal Plane Dysfunctional Proportions*

8.3.2.5. *Sagittal Plane Dysfunctional Proportions*

8.3.2.6. *Frontal Plane Dysfunctional Proportions*

8.3.2.7. *Remarks*

8.3.3. *Techniques*

8.3.4. Children

8.4. Spinal Approach

8.4.1. General

8.4.2. Integrity Goal

8.4.3. The Upper Cervical Region in Relation with the CSF

8.5. Approach of the Autonomic Nervous System

8.6. Nutrition

8.6.1. Calcium

8.6.2. Water and Sodium (Na)

8.6.3. Potassium

8.6.4. Magnesium

8.6.5. Chloride

8.6.6. Phosphor

8.7. Sleep

9. Bibliography
