

## The Bullerjan cook mini - A little smaller - but still great!

Like the Bullerjan cook, the Bullerjan cook mini impresses not only with its excellent heating and storage properties, but also with the option of preparing food on the integrated hotplate.

An absolute "all-rounder" for all those who do not want to do without functionality even with a small stove.

With a tested nominal heat output of 4.5 kW, the Bullerjan cook mini is ideal for small rooms - but of course also provides sufficient output in larger rooms with lower heat requirements.

Thanks to the 4-6 cm thick fireclay lining (42 kg), the cook stores a large part of the heat generated during combustion and then releases it into the room where the stove is installed for a period of 3-4 hours after the fire in the stove has already gone out.

The solid, cast-iron body of the cook mini is almost "uncapable" - a 15-year guarantee underlines the quality and longevity of this stove.

### Product features and equipment

- Nominal heat output 4.5 kW, efficiency 81%
- Combustion chamber lined with 6 cm thick fireclay
- Hotplate with a diameter of 21.9 cm
- Stove body made of cast iron, black
- 15 years warranty with product registration
- Unrestrictedly admissible

### Technical data

Heating capacity	4.5 kW
Efficiency	81 %
Dust	35 mg/m <sup>3</sup>
CO content (13 % O <sub>2</sub> )	750 mg/m <sup>3</sup>
NO <sub>x</sub> (13 % O <sub>2</sub> )	118 mg/m <sup>3</sup>
Exhaust gas mass flow	5.5 g/s
Average flue gas temperature	205 °C
Average delivery pressure	12 pa
Fuels	Logs, 25 cm
Energy efficiency	106
Energy class	A+
Connection	12 cm diameter
Height	77.8 cm
Width	37.4 cm
Depth	46.0 cm
Weight	119 kg
Distance to combustible materials	
Page	40 cm
Rear	30 cm
Front	70 cm
