

# Garden Tasks for January

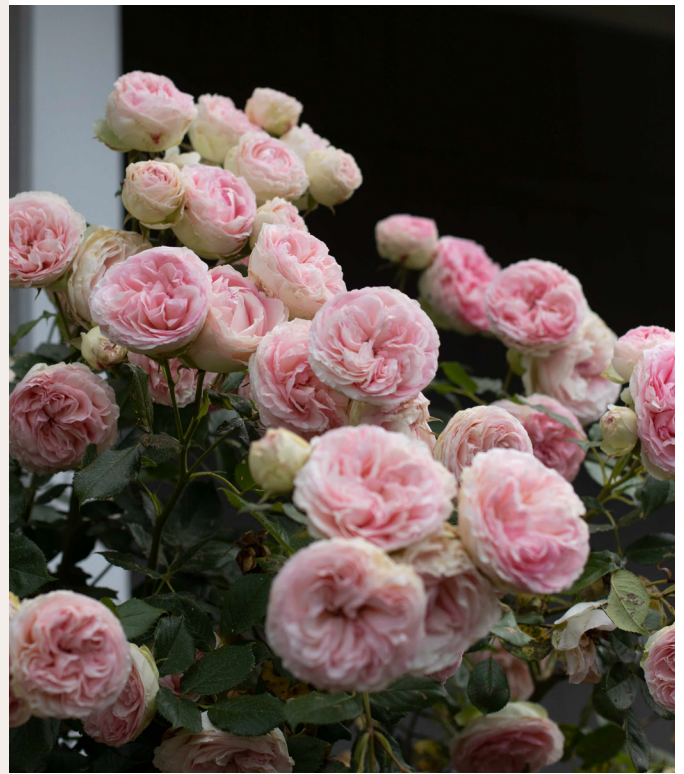

Kiss Me Kate™ Arborose®

# 1

## Measure your garden and sketch a rough draft.

---

We recommend using graph paper or a nice coiled notebook to keep all your gardening notes in one place. Add in all plants and trees that are staying put. Mark plants you would like to move. Mark off areas that need more plants. If you are gardening on a patio or porch, make an inventory of what pots you have and how many more you might need and how many bags of soil you will need.

# 2

## Time to dream!

Scroll through Heirloom Roses' new website. Notice what roses stand out to you and write down their names. Visit our Heirloom Roses pinterest page or Instagram for inspiration. Search the hashtag #HeirloomRoses on social media. Don't be too specific or concerned with color. If you love it or it catches your eye, add it to the list. You will narrow the list down later.

Be sure to include the names of sentimental roses, such as ones your grandmother had in her yard that you want to include in your garden. Add these roses to your Heirloom Roses wishlist for easy access.

# 3

## Find your hardiness zone.

Find your hardiness zone. Knowing your zone ensures that the roses you choose will thrive in your garden. If you aren't sure which zone you are in, click [HERE](#).

# 4

## Look Over Your Heirloom Roses Wishlist

---

Do you see a color theme emerging? Make a list of the colors you are drawn. Where would you like these colors to appear in the garden? Do you want a row of white roses paired with blush pink? Perhaps vibrant orange and yellow roses together to create a statement? There are so many choices: Monochromatic, gradient theme of light to dark, intense color, even rainbow order! Mark your color preferences on your garden sketch.

# 5

## Review Your Wishlist or Cart With Your Garden Sketch In Hand

---

Review your wishlist or cart with your garden sketch in hand. Determine which rose will go in each specific location and write it on your garden sketch. Get creative using colored pencils to really make your sketch come to life. Consider if you would like a full, voluminous feeling which may require 2-3 roses of a singular variety to make a big impact statement. Consider also the growth habit of each rose.

That's it! Add your final list to your cart and checkout.
