For Your Garden

GUIDE

5 BENEFICIAL INSECTS	HEIRLOOM ROSES	SPRING 2023
-------------------------	-------------------	-------------

GUIDE

For Effective Results:

- Keep out of direct sunlight
- Keep away from direct sprays of water
- Hang different beneficials apart from each other
- Do not crush, squeeze, or tear
- For use on roses or any vegetation
- Safe for all humans and pets

Instructions:

Cucumeris or Californicus (July)

1. Separate sachets without tearing paper.
2. Hang sachets evenly around the garden.
3. Protect from water and direct sun.

Green Lacewing Larva

1. Caution: Live eggs are directly on the strip; do not crush.
2. Cut along edges taking extra care to not crush eggs.
3. Hang tag in center of plant with eggs facing inward.
4. Protect from water and direct sun.

Encarsia

1. Tear tag away from perforated edges.
2. Hang tags evenly around the garden.
3. Protect from water and direct sun.

Ervi x Colemani

1. Gently open back of blister pack with tab avoiding touching wasps.
2. Hang tag centrally or near an aphid outbreak under foliage.
3. Protect from water and direct sun.
