Software

Basic setting

* You can program your mouse button to any multimedia function and gaming function by selecting the bar on the mouse picture and select your desire command on the button assign bar.
* Press Apply to save changes.

Advanced setting

* You can customize your mouse pointer precision, wheel speed, fire speed and report rate on advanced setting bar.
* You can customize your mouse DPI level on the DPI setting bar
* Press apply to save changes.

Macro setting

* To create a new macro in settings, press "+" bar on the macro group bar, input the name of the macro folder, then press "+" bar on the macro bar input the macro name and start record your macro

Example:
- Add macro key folder name "ASD"
- Add macro key name "ASD"
- Press Record Button and type "ASD" then press Stop Recording
- You can edit delay time/cycle before saving.
- Press save/apply button to save your macro "ASD"

* To use your macro "ASD"
1. Go to base setup bar
2. Select button you want to apply the macro "ASD"

3. Then select Macro and select ASD
4. Save & Apply
Your button will be used as "ASD"

* To check your Macros
1. Go to notepad
2. Click the assigned macro button
3. It should type ASD

Note: "ASD" is just an example, you can use your own keys for macros.

How to connect

Its plug and play. Connect the mouse to computer by inserting USB jack to your computer USB port.
