

Postal Consultation

Send samples to:

THE INSTITUTE OF PHYTOBIOPHYSICS® Le Prevot, La Grande Route de St Clement, Jersey, JE2 6QQ

Telephone: + 44 (0)1534 738737 Email: info@phytob.com or diana@phytob.com

<https://www.facebook.com/dianamossop> please see <http://www.phytob.com> for further information.

For the first full postal consultation, the cost is £100 inclusive of two to three personalised remedies. These are made up from test kits that are devised by the analysis and are made up specifically for you. The consultation is done in two phases. The first phase is an in-depth analysis of the DNA and RNA [Hair and Saliva] in order to discover the underlying journey and patterns of life that conspire to create the presenting symptoms. [The Cause of the problem] this is referred to as The Heart Lock Theory.

The second phase of the consultation is to devise a Phytobiophysics treatment protocol with the required Flower Formulas. The Phytobiophysics formulas are described in detail on the www.phytob.com website and it is recommended that you read about the formulas in order to understand why they have been recommended for you. The price list for these formulas is listed at the end of this advice sheet.

Follow up postal consultations cost £85 [including up to 3 remedies], these are generally recommended at 6-8 week intervals if necessary.

The above charges always include the formulas that are made specifically for the individual, but not other recommended supplements including Phytobiophysics® Flower Formulas and Super Fit Formulas, Heart Power etc.

Payment details should be given prior to testing over the phone on our secure telephone system 01534 738737 Initial consultation. Fee will be taken as Diana nears completion of your consultation. She will then contact you via email with her findings. If required she will offer a half hour zoom chat arranged at a suitable time to discuss the findings.

Hair/ Saliva samples

Using a clean cotton bud take a swab from the mouth first thing in the morning prior to cleaning the teeth, drinking or eating. **IMPORTANT:** This swab must be wrapped tightly in cling film and then placed in sealed plastic bag. Hair should be clipped from the nape of the neck, stuck on to cardboard with sellotape, wrapped in cling film and placed in a clear sealed plastic bag. This should then be placed in a white paper envelope. Please clearly mark your name.

The envelope containing the samples should be placed in a further envelope/jiffy bag along with your contact details (**Postal address in block capitals** please), date of birth and your email address. The sample will survive intact for at least a month if not longer so it can be sent by regular mail.

Please include a full, but brief explanation of your problem, history, present medication or treatment, i.e. fill out the client consultation form which will be provided for you to complete.

A recent photograph of you would also be helpful if I have never met you before.

Please complete and return the form below with as much detail as possible to assist me to analyse your needs.

Anyone wishing to stock up on supplements or formulas etc. can also contact the clinic 01534 738737

For those of you in Jersey, if you order and pay over the telephone, you can then collect your products/formulas/supplements etc. from the doorstep when convenient or alternatively ask for them to be posted to you.

I am here to help and advise you.

With love and best wishes,

Diana Mossop

Diana will recommend Phytobiophysics Formulas in order to support you.

You can read about and purchase the relevant formulas from the clinic or from: www.phytob.com

The cost of the recommended formulas is as follows:

Formulas	cost incl VAT	cost [no VAT

CLIENT AGREEMENT

“I explicitly consent to the health data that I have provided being processed by DHBC Limited. I understand that I can withdraw my consent at any time. For further details see the privacy policy of DHBC Limited at www.phytob.com.”

Phytobiophysics® is a non-medical analysis of health and nutritional imbalances and I understand that my practitioner is not medically trained, is not able to diagnose medical conditions nor advise me about my medical drugs.

Podo-Rhacidian Therapy (PRT) is a Cranio-sacral mobilisation technique which allows a free flow of nerve and meridian energy. It is not manipulation.

Live Blood Analysis involves a small sample of blood being taken via a sterile needle and analysed under a microscope for non-medical, nutritional and information purposes.

I agree to treatment sessions with Diana Mossop and/or Anthony Mossop and fully understand that it is my responsibility to say whether I feel that the treatments are right for me.
