Experience innovation and convenience with the Hills range of centrally ducted vacuums. Offering advanced and powerful vacuuming technology at your fingertips, Hills have now made it easier to have cleaner and more hygienic home.

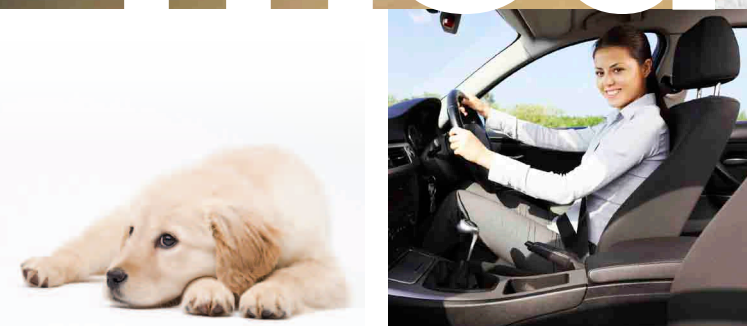

HillsTM
CentralVac

Cleaner Air

House dust mites live in our homes. The average square metre of carpet is home to 10,000 dust mites (approx). The most effective way to remove dust is by using a vacuum cleaner. Both the Hills CentralVac and CrystalForce vacuums transport dust and particles to the main unit by a series of pipes that are installed behind the walls or under the floor of your home.

Advanced Vacuum Technology

modern, style

Features

- Cyclonic operation
- LCD display (CF model only)
- Powerful 240VAC 1600W Motor
- High efficiency particle air filter
- Garage motor utility valve included
- Low maintenance
- Optional floor sweep inlet for high traffic area's (kitchen area)
- Sturdy ABS construction
- Thermal motor protection
- Low noise

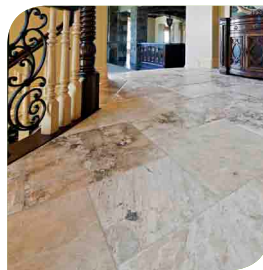

Easier to use

The Hills central ducted vacuum range provides you with a convenient solution for a cleaner home. There are no bags to empty or electrical cords to trip over. No heavy lifting and dragging of traditional canister or upright vacuum cleaners from room to room or up and down the stairs.

Stylish design

The Hills range of centrally ducted vacuum cleaners delivers flexibility, convenience and low maintenance. Encased in a modern and stylish design, both the Hills CentralVac and CrystalForce vacuums feature a powerful cyclonic-operated motor, coupled with a HEPA filter, for effective suction as well as eliminating the recirculation of dust. The CrystalForce vac features an LCD display, allowing you to keep on top of your vacuuming. The central vacuum system solution adapts to a broad range of cleaning surfaces such as carpeted or tiled floors, furniture and motor vehicles.

Typically installed in a garage or utility room, it provides super quiet operation and a healthier living environment. The Hills central ducted vacuum system is the ideal choice when building your next home and is also suited for existing and or renovated homes. The presence of a Hills centrally ducted vacuum system adds value to your home.

Features

- Cyclonic operation
- Aesthetic design
- Powerful 240VAC 1600W motor
- High Efficiency Particle Air (HEPA) Filtration
- 16 litre dust collection bucket with integral carry handles
- 3400mm H2O Suction / Waterlift
 - Sturdy ABS construction
 - Low noise - 69 dB
- Thermal & c/breaker motor overload protection
- Garage utility valve included
- Dual 50mm Inlets for left and right handed pipe
 - Peripheral bypass exhaust
 - 210 Cu/mH Airflow
- Internal & external muffler supplied standard
 - 800 Hours min operation
 - 100% Duty cycle

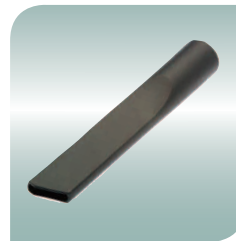

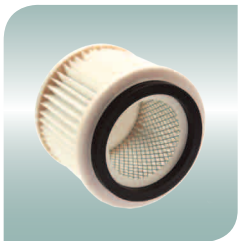

Features

- Cyclonic operation
- Aesthetic design
- Powerful 240VAC 1600W twin turbine fan cooled motor
- High Efficiency Particle Air (HEPA) Filtration
- 3460 mm H2O Suction / Waterlift
- Sturdy ABS construction
- Thermal & c/breaker motor overload protection
- Garage utility valve included
- Outside exhaust to eliminate dust recirculation
- Dual 50mm Inlets for left and right handed pipe installation
- Standard Garage utility inlet valve
- Peripheral bypass exhaust
- 608 Air Watts
- Internal & external muffler supplied standard
- 800 Hours min operation
- 100% Duty cycle

PLUS

- + LCD maintenance display
- + Variable speed suction control
- + 25 litre dust collection bucket with integral carry handles
- + Low Noise - 67 dB
