

TRUCK KITS

EthylBloc™

Designed for Protection Against Ethylene Damage and Loss (Canada)

EthylBloc™ is an ethylene-action inhibitor that protects vegetative cuttings, bulbs, and plant foliage, flowers and buds against ethylene's negative effects. Rather than blocking ethylene production, this innovative technology works naturally with plants to bind their ethylene receptors, safeguarding against ethylene from the plant and the surrounding environment. With environmentally friendly EthylBloc™ treatments, you can protect plants at any supply chain point to inhibit ethylene-induced damage, reduce plant loss and extend plant life. Versatile EthylBloc™ Truck Kits are ideal for larger spaces, including truck trailers and shipping containers.

Applications

Ideal for treating all types of ethylene-sensitive plants, flowers, vegetative cuttings and bulbs, including orchids, tulips, tropicals, annuals and perennials.

Features & Benefits

- + Ethylene-blocking technology works naturally with plants, flowers, vegetative cuttings and bulbs by binding their ethylene receptors, inhibiting the action of ethylene gas.
- + Ethylene-blocking technology works naturally with plants, flowers, vegetative cuttings and bulbs by binding their ethylene receptors, inhibiting the action of ethylene gas.
- + Helps eliminate leaf yellowing and premature flower opening and aging along the supply chain, increasing flower and plant life up to three times longer.
- + Reduces ethylene-induced flower, bud and leaf drop, extending shelf life and minimizing costly shrink. Plants look and perform better during shipping, at retail and at consumers' homes.
- + Perfect for treating flowers and plants in smaller enclosed spaces, from even the smallest shipping boxes to sealed trolley treatments.
- + Health Canada Pest Management Regulatory Agency (PMRA) approved, EthylBloc™ technology supports sustainable pest management. Nontoxic and safe for workers, treatment requires minimal labor.

Blocks ethylene receptors to inhibit ethylene damage

Decreases leaf yellowing and premature flower aging

Reduces ethylene-induced flower, bud and leaf drop

Environmentally friendly, leaves no trace or residue

Effective at room temperature and refrigerated conditions

Technical Specifications

Product Description: EthylBloc™ is a powder that, when mixed with water, releases a gas which binds to ethylene receptors in plants to block ethylene's negative effects on foliage, flowers, buds and bulbs, thereby extending plant life and reducing damage and loss.

Note: EthylBloc™ Truck Kits are designed for use in enclosed spaces. The receptor-binding technology protects against ethylene produced by plants and ethylene in the environment.

Ingredients	Percentage
Active Ingredient: 1-Methylcyclopropene	0.14%
Other Ingredients	99.86%
Total	100.00%

Storage and Handling

Store in original packaging out of direct sunlight in a cool, dry location. Shelf life of unopened packaging is 2 years from the manufacture date. Once opened, use within 2 weeks for best results. Careful resealing can extend product efficacy. For complete safety information, review the product label and Safety Data Sheet.

Food Safety

This product is intended only for use on ornamental plants, not for food use.

Disposal

This nontoxic technology contains no heavy metals. Dispose of used paper-based sachets with general waste. For unused sachets, please check with your local waste disposal facility.

Dosage Chart

EthylBloc™ 72g Truck Kit Treatment Volume			
Shipping/Treatment Temp. (°C)	Treatment Duration (hrs)	Volume Treated (ft ³)	Volume Treated (m ³)
10–24	4 to 8	Up to 5,000	150
10–24	Minimum 10	5,000–10,000	300
2–10	Minimum 10	Up to 5,000	150
