### 1) Signature Pattern - An absolutely beautiful pattern!

- a) Entire UPPER and LOWER SURFACES and STABILIZERS are a primary color.  
b) All internal RIBS and SLIDER are a contrasting secondary color.

We recommend white or light colors for primary and darker colors for secondary.

### 2) Panel by Panel

To color your canopy panel by panel, indicate the color of each cell by placing the 3 letter identifier in the appropriate box below. This is as if the canopy were flying toward you. The ribs, stabilizers, and slider will be matched accordingly, unless specified. Symmetrical patterns are recommended. NOTE: For complex patterns and/or the use of 4 or more colors, additional charges may apply.

*EQUINOX is a hybrid construction canopy, a combination of zero porosity and low porosity fabric. Because of this, range of available colors is limited. Color shades may vary depending on type of fabric and dye lots.*

*The EQUINOX is engineered for student/novice jumpers looking for reliable openings, easy manoeuvrability, and comfortable pack volume. Students can then transition smoothly to other intermediate canopies like the Safire 2 or the Omega. It is also the perfect choice for dropzones and schools in need of reliable and forgiving canopies for their AFF, S/L, Rental gear.*

*The EQUINOX encompasses rugged construction, cost effectiveness, and consistent openings during its life span.*

*The EQUINOX is manufactured by CIMSA Ingenieria de Sistemas, S.A. like the rest of ICARUS Canopies products, under the highest Quality Control standards.*
