

NEW PRODUCT
12 Foot Brake Line Coils

12' BRAKE LINE COILS

The Economical Solution to Single Line Replacement

12 foot coils are a much more economical choice when only a single line or smaller lines need to be replaced. Less wasted product, especially for DIYer's who are typically replacing only a single line or portion of a line one time.

Available in Poly-Armour®, Stainless Steel, or NiCopp® in 3/16" or 1/4" Sizes

Poly-Armour® has a Poly-Vinyl Fluorine coat. A highly durable 'plastic' coating that is 'baked and cured' to the line. Poly-Armour® offers 30x the corrosion resistance of galvanized steel alone.

AGS® marine-grade Stainless Steel tubing contains Molybdenum for added corrosion protection. Manufactured using a soft-annealed heat treatment for a tough, corrosion-resistant, and polished finish.

NiCopp® has the strength and structural integrity of steel lines but so much easier to shape, bend and flare. NiCopp® is the choice in harsh environments. NiCopp® does not rust or corrode and is DOT approved for hydraulic brake systems.

Poly-Armour® PVF Coating

- Electric Zinc Plating
- Copper Brazed Bond
- Brazed Copper Coating
- Beveled Seam Edges for Smooth, Bead-Free Joint
- Double-Wall Close Tolerance, Low Carbon Roll-Formed Steel

Seamless Drawn & 316L Stainless Steel

Cold Drawn & Annealed Copper Nickel Alloy

- Double-Walled • Low Carbon Steel
- Copper Brazed • Zinc Undercoating
- PVF Coated • EZ-BEND Technology
- 316L Stainless Steel
- Molybdenum
- Marine Grade
- Single-Walled
- 90-10 Copper Nickel Alloy
- EZ-BEND+ Technology

Pair with AGS Fittings for a High Quality Finish!
