## **What is a dissertation?**

A dissertation is a type of academic writing that is presented by Ph.D. students for their final project before attaining their doctoral degree. You have to choose a research question or a problem and conduct deep research on it to be able to find its solution through the implementation of various methodologies and calculations. You have to collect real data by using data research methods and conduct your research to find accurate results. You have to get your research proposal approved by your supervisor before working on the dissertation.

A dissertation is the most important piece of academic writing in the education career of students because it determines their future. Ph.D. students have to successfully write and present dissertations to be able to achieve their doctoral degrees.

Here are some tips and techniques that will make the writing process easier for you!

## **Tips to write dissertation**

### 1. Choose your research question

You should be able to choose an interesting yet significant research question for your dissertation. Your research question must present an academic or scientific problem. It is important to choose a topic that will have a huge impact on society. You have to conduct a brainstorming session before finalizing your topic that is unique, impactful, and reasonable. You should not end up picking up a too difficult and complex topic that will get you stuck in the middle of writing your dissertation.

### 1. Structure of dissertation proposal

You have to make sure that your proposal is appealing. You have to follow the provided structure for your proposal to make look more professional. You should include a dissertation title in your proposal, objectives of the dissertation, literature review, research, methodologies that will be used to conduct the research, expected outcomes, the time frame, and a list of references.

It is important to provide an overview of your research in your proposal to keep a track of your writing when you write an actual dissertation.

### 1. Deep and effective research

Conducting effective and in-depth is one of the most significant parts of writing a dissertation. You have to determine that your research requires qualitative or quantitative research. In some cases, you require both

types of research. You should collect data based on the research question to apply the calculation to deduce accurate results.

1. Draw an outline

You have to draw an outline before writing your dissertation. The outline must include the abstract, introduction, literature review, methods, findings, and conclusion of the dissertation.

1. Edit and proofread

Once you have completed writing your dissertation, it is important to give it a read and correct your mistakes yourself. Afterward, get your work proofread by professional [essay writer](#) or software to correct grammatical or technical mistakes.

Writing a dissertation is not a piece of cake. It requires deep knowledge of the subject, research, excellent writing skills, and a lot of time to be able to start the process. Don't worry if you are running out of time or lack writing skills because I have an amazing offer for you. You may have heard about the writing platforms on the internet. There are plenty of [essay writing service](#) working online to provide academic assistance to the students at highly affordable rates.
