

Customer Assistance Guide

Q. How long will the oil last?

A. This depends on the essential oil used. A base note oil (such as Sandalwood) will take longer to vaporize than a middle note oil (such as Lavender), which in turn will take longer to vaporize than a top note oil (such as Lemon). Essential oil blends will vary according to the combination used.

Q. Is my Vaporizer working properly?

A. The type of oil you use will make all the difference to your Vaporizer's performance.

Here are some hints about using essential oils.

- Your Vaporizer is designed for use with essential oils, rather than fragrance oils.
- Respected essential oil brands are less likely to contain impurities, which will not vaporize.
- Base oils, while excellent for other purposes, won't vaporize. Check whether the essential oil you want to vaporize contains base oils, e.g. 3% rose in Jojoba oil.
- Some essential oils vaporize more quickly than others and essential oil blends vaporize according to their constituents.
- Remember to clean your vaporizer regularly.

Q. Do I have to turn the Vaporizer off when the oil has vaporized?

A. No. With its low temperature control, the Aromamatic® Vaporizer allows safe and continuous operation.

Q. What happens when the oil has finished vaporizing?

A. No harm will come to Vaporizer when the oil has vaporized away.

Q. Why don't I add water?

A. Heat emitted by the recessed bowl of the Vaporizer is low, which means that it vaporizes essential oils without burning them. This makes the use of water unnecessary.

Q. Why can't I smell the oil?

A. Aromas that are continually inhaled through our olfactory system will cease to be recognized after a period of time. This is called fading.

Q. My Vaporizer doesn't seem hot enough? It's getting too hot?

A. To establish whether the Vaporizer is heating correctly try:

The Touch Test - Turn the vaporizer on and allow it to reach full operating temperature. This will take around fifteen minutes. Lightly touch the centre bowl with your fingers. If it is warm to the touch and you cannot leave your fingers in the bowl, the Vaporizer is working correctly.

One Year Guarantee

electric oil vaporizer

Aromamatic® Products guarantees for a period of one year from the date of purchase to replace or repair any electrical components of the Aromamatic® Vaporizer found defective by the manufacturer or their approved agent. This Guarantee does not include replacement of a damaged or broken ceramic bowl or external damage to the electrical cable or plug. The Aromamatic® Vaporizer must only be used with the power supply indicated on the base plate. If the supply cord of this equipment is damaged it may only be replaced by a repair shop appointed by the manufacturer. If the base plate has been broken or forcefully removed this Guarantee is void.

- Fully insulated internal wiring system
- Operates between 70 – 75°C and is rated at 4 watts
- One Year Guarantee on all electrical components
- Ideal for any location or environment

Aromamatic® Products Pty Ltd was established in 1992 and is a wholly Australian owned company.

How to use your Vaporizer

To obtain the best results from your Vaporizer

- Simply plug into a standard electrical outlet and allow 15 minutes to reach full operating temperature.
- Add 8-10 drops of your favourite essential oil or essential oil blend to the recessed bowl and enjoy.
- Use only pure essential oils. Essential oils diluted with base/carrier oils will not vaporize.
- Take care not to overfill the Vaporizer. Spilled oils may damage some surfaces. Use our recommended quantities.

Caring for your Vaporizer

After your essential oil has vaporized from the bowl, wipe clean with a damp cloth. Alternatively, add 2-3 drops of essential oil or vaporizer cleaner to the warm bowl to loosen any residue that may remain.
