Guarantee & Instruction Card

# Multi-light Wax Melt Electric Warmer

The aromamatic® LED Electric Wax Warmer combines the self-regulating temperature of a wax warmer with the latest LED lighting technology to create a unique way to efficiently enjoy your favourite soy wax melts.

This ultimate two in one Wax Warmer blends the aromatic and visual world to create a tantalising aromatic atmosphere. The LED Wax Warmer is ideal for creating an aromatically, mood enhancing atmosphere with its soft gentle light.

To obtain the best result for your aromamatic® Electric Wax Warmer and capture the true ambiance of the warmer, place it near a reflective surface and enjoy the vibrancy of the lights.

## Instructions

Plug the aromamatic® Wax Warmer into a standard electrical power outlet and turn on the power.

Please allow up to 15 minutes for the warmer to reach full operating temperature.

Then add your favourite wax melt/tart to the bowl.

Take care not to overfill the warmer as spilled wax may damage some surfaces.

The warmer can be operated independently of the LED lights by pressing the On/Off switch at the rear of the warmer.

Always keep safe around children.

## How to Use

Remove all labels and packaging from the Wax Melts before use.

Add your favourite Wax Melt or Tart to the bowl - do not overfill the bowl.

The dissolving time of individual wax melts will and can vary from product to product. Please refer to manufacturer details.

To remove used wax melts, ensure the melt has cooled and hardened before gently dislodging it from the warmer.

Wipe clean with a damp cloth and replace with a fresh melt/tart as desired.

## Customer Assistance Guide

**Q. How long will the lights last, what are LEDs and are they safe?**

A. The longevity and reliability of the LED's is over 50,000 hours and is equivalent to the life of the warmer. LED stands for Light Emitting Diode. There is no glass bulb, no tiny wires and no gas, they are mechanically rugged.

**Q. Is the aromamatic® Wax Warmer suitable as a night light?**

A. Yes, however it is not suitable as a reading lamp.

**Q. How long will the wax melt last?**

A. Please refer to the manufacturer's packing for details.

**Q. Is it safe to leave the warmer on at the power point?**

A. Yes, with its low temperature control, the aromamatic wax warmer allows for a safe and continues operation.

## The Touch Test

Turn the warmer on and allow it to reach full operating temperature.

This will take around fifteen minutes. Lightly touch the centre bowl with your fingers. If it is warm to the touch and you cannot leave your fingers in the bowl, the warmer is heating and working correctly.
