PRODUCT FEATURES

- Pearl and Solid Metallic Effects
- Scratch Resistant
- Non-Yellowing & UV Resistant Topcoat
- Apply Direct-to-Metal* & Concrete
- Single Component

FEATURED PROJECT

Metalithane 1K in Semi-Solid finish was applied here to a painted wooden sample board to demonstrate the finish.

METALITHANE™ 1K

Metallic Aliphatic Polyurethane 1K

Metalithane™ 1K is a single-component aliphatic urethane available in a wide variety of metallic finishes, including pearl and solid options. It is a high-performance, zero VOC coating that has excellent scratch and chemical resistance for high-end metallic finish uses. It can be applied on a wide variety of substrates and has excellent adhesion to slick surfaces. The standard pearl and solid metallic options are available in a pre-mixed gallon. The metallic flake can be purchased separately and added to create custom effects. A local RainguardPro sales representative can assist with custom effects, drawdowns and color matching when requested.

Available in 32 Oz. and 1 Gallon Sizes
