

RainGuardPro.com | (888) 765-7070

PRODUCT FEATURES

- 1000% Elongation
- Horizontal or Vertical Applications
- Exceptional Adhesion to Most Substrates
- Rust & Corrosion Control

POTENTIAL PROJECT

Use Rubber-Lok to waterproof below grade installations, stop leaks, and more!

RUBBER-LOK

Liquid Synthetic Rubber

Rubber-Lok is an ultra-tough, super-waterproofing, alkali resistant, water-based copolymer elastomeric coating uniquely formulated to waterproof and protect a variety of substrates. Rubber-Lok creates a tough, long-lasting protective membrane that remains flexible over time, even under adverse conditions. Its elongation and tensile strength provide unsurpassed resistance to maintenance traffic, weather conditions, and wear. It can be used for roof repair and restoration, below grade and foundation waterproofing, restoration and repair of rusty gutters, and sealing the inside of planter boxes.

Available in 1 Gallon and 5 Gallon Ready to Use Containers

AT A GLANCE

COLOR	Black
FINISH	Satin
SURFACES	Concrete, Stucco, Masonry, Wood, Fabrics, Metal, Natural Stones, Foam, Asphalt, Mineral Surface Modified Bitumen, Smooth Surface Modified Bitumen, Smooth Surface Built-Up Roof, Mineral Surface Built-Up Roof, Granulated Asphaltic Surfaces
